Durodent Dental Supplies has been established in the Australian dental market since 1989.

Durodent stocks a comprehensive range of world class dental materials, instruments and equipment to service dental laboratories and dental prosthetist's throughout Australia.

We aim to stock proven & reliable products from many of the major dental brands.

Durodent takes pride in being a key distribution partner for *Kulzer* in Australia. The *Kulzer* brand is world renowned, being a leading manufacturer of premium dental prosthetics and equipment for the global dental market.

We stock the complete Kulzer laboratory range including the highly regarded PALA range.

We strive to continue to bring new and beneficial products to the Australian market as we aim to support your business with the best products, at the best price, at the right time.

We look forward to looking after you.

PREMIUM ACRYLIC TEETH BY KULZER PALA

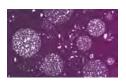

The Kulzer PALA Premium Teeth Range Featured in Premium, Idealis and Mondial Moulds

Each of the three PALA premium teeth lines from Kulzer (**Premium, Mondial and Idealis**) have been designed using identical manufacturing processes and materials. CAD CAM designed with the same superior material combination and Nano Pearl technology, multiple layers of dentine and enamel are blended to create a **natural, lifelike effect.**

Engineered for a Natural Appearance: layering, surface structure and colour effect work to produce a more natural look.

- Three-dimensional multi-layering technique Interlocking layers produce a blended translucent enamel
- Configures to square, triangular, oval and rectangular face shapes
- Pronounced contouring of surfaces ensure dynamic shades in every light

State-of-the-Art Technology: Kulzer use CAD/CAM technology to create completely matched pairs of teeth, and build superior strength with INCOMP technology.

- Precision with no dimensional deviation
- Teeth fit together for perfect intercuspation
- Technologically advanced injection/compression manufacturing process
- Produces a dense, hard material without voiding, with extremely clean cuts and superior finish

NanoPearls® – for highest abrasion and fracture resistance

- The patented NanoPearls® material is comprised of unique micro-fillers combined with viscoplastic nano particles
- The result: high abrasion resistance and natural opalescence and surface quality coupled with high fracture resistance and durability
- 100% colour stable materials for lasting colour stability
- Abrasion resistance comparable to composite denture teeth

Plaque Resistance and Colour Stability

- Denture Teeth need to keep their original shade during clinical use for greater patient satisfaction and to avoid revision after a short period of time. Plaque resistance and colour stability are key factors influencing shade accuracy during clinical use.
- In vitro studies prove that excellent plaque resistance and colour stability is achieved with the Premium, Idealis and Mondial teeth through the use of Nanopearls® material.

Pala Mix & Match gives you the freedom to combine aesthetics and function in order to achieve perfect results every time.

- Pala Premium: Fully anatomical morphology for perfect results in high-quality partial dentures.
- Pala Idealis: Ideally suited for implant-borne dentures and gerontoprosthetics thanks to its naturally reduced cusp angle.
- Pala Mondial: Easy set-up and maximum flexibility thanks to the wide variety of designs.

Giving a hand to oral health.

ACRYLIC TEETH – KULZER PALA RANGE

	Equals 30% discount of normal tooth prices
	Kulzer Premium Anteriors x 48 / Mondial Posteriors x 36 Small
K-PTB	Assortment Intro Case – Includes shades A2/A3/A3.5 – 48 Anteriors /
	36 Posteriors – Cardboard / Plastic Draw Display Case – 1pc – 66058142

Pala Premium is our tooth line for the highest demands for aesthetics, function and natural appearance.

With its fully anatomical morphology and its natural light dynamic, it yields very high quality results, particularly for removable and fixed dentures, and thus facilitates effective integration to the residual dentition.

Premium teeth are made by blending multiple layers of dentine and enamel to create a natural, lifelike effect. This blending guarantees enduring colour stability and long-lasting wear, with a shading effect that is indistinguishable from natural teeth.

CAD/CAM moulds and the INCOMP manufacturing process allows for a dense, hard tooth and a perfect fit every time.

- NanoPearl Technology Multilayered
- Shades: 16 VitaPan Shades (A1 D4), 2 Bleach Shades (BL2-BL3)
- Moulds: 14 Upper and 8 Lower Anterior Moulds, 4 Upper and 4 Lower Posterior Moulds
- Posterior Cusp Angle 33 Degrees

	Customer Only	

The Pala Mondial tooth line with its wide range of shapes offers a high degree of flexibility in all areas of removable prosthetics.

The universal tooth line has proven its worth in all areas of modern removable prosthetics. The precisely defined centric makes set up safe and easy. Pala Mondial teeth require virtually no grinding to ensure precise function for every tooth.

Both lines feature NanoPearl* technology, a long-lasting, abrasion-resistant formula, along with precise INCOMP manufacturing methods and CAD/CAM moulds.

- NanoPearl Technology Multilayered
- Shades: 16 VitaPan Shades (A1 D4), 2 Bleach Shades (BL2-BL3)
- Moulds: 18 Upper and 10 Lower Anterior Moulds, 5 Upper and 5 Lower Posterior Moulds
- Posterior Cusp Angle Life Like Cusps 20 Degrees
- Lingualised Occlusion: Lingualised Occlusion Combine upper posteriors with Idealis lower posteriors.
- Purchase Options: To enquire call 1800 653 439

Mould Charts – Refer to last pages or download at www.durodent.com.au

PALA Idealis 8 - Kulzer

1	Code	Description	
1	18	Kulzer Idealis 8 (Posterior) – 1 Card	

The Pala Idealis posterior tooth line with its naturally reduced cusp angle is ideal for implants and prostheses for the elderly.

The **Pala Idealis** posterior tooth with its wide tooth neck and high volume is the ideal solution for implants and tertiary structures. Better interdental closure and optimal clean ability through bigger proximal surfaces.

Pala Idealis posterior teeth can be combined with both Pala Mondial and Pala Premium anterior teeth as required. Combine with Mondial Upper Posteriors to achieve lingualised occlusion.

Extra Indications:

- Implant-borne prosthetics
- Geriatric prosthetics
- Functional therapy
- Shades: 16 VitaPan Shades (A1 D4), 2 Bleach Shades (BL2-BL3)
- Moulds: 4 Upper and 4 Lower Posterior (31, 33, 35, 37)
- Posterior Cusp Angle 5 Degrees
- Purchase Options: To enquire call 1800 653 439

Mould Charts – Refer to last pages or download at www.durodent.com.au

ACRYLIC TEETH — KULZER CLASSIC LINES

Optostar 6 / Optognath 8 – Kulzer (4 Layer Tooth)

Code	Description	
Н6	Kulzer Optostar (Anterior)	
Н8	Kulzer Optognath Silver (Posterior)	

- 4-Layer-Tooth Classic Range
- Excellent range of practical moulds and sizes to cover all jobs
- Unique 4th-layer design ensures that the teeth look natural under any light.
- Same moulds as Optodent Classic range which is a 3 layered version (Refer below)
- Optognath Posteriors Unique hollow neck improves bonding and eliminated the need for any grinding.
- Manufactured by Kulzer Germany
- Shades: 16 VitaPan Shades (A1 D4)
- Moulds: 23 Upper and 12 Lower Anterior Moulds, 5 Upper and 5 Lower Posterior Moulds
- Posterior Cusp Angle 28 Degrees

Optodent 6 / Optognath 8 – Kulzer (3 Layer Tooth)

Code	Description	
В6	Kulzer Optodent (Anterior)	
В8	Kulzer Optognath Gold (Posterior)	

- 3-Layer-Tooth Classic Range
- Excellent range of practical moulds and sizes to cover all jobs
- Same moulds as Optostar Classic range which is a 4 layered version (Refer above)
- Optognath Posteriors Unique hollow neck improves bonding and eliminates the need for any grinding.
- Unique shading blends in well with natural dentition for partial work
- Manufactured by Kulzer Germany
- Shades: 16 BIO-IVO Shades (11 41) excluding shades 10, 16, 22, 26, 30, 39, 40
- Moulds: 23 Upper and 12 Lower Anterior Moulds, 5 Upper and 5 Lower Posterior Moulds
- Posterior Cusp Angle 28 Degrees

Basic 6 & 8 – Kulzer (3 Layer Tooth)

Code	Description
C6	Kulzer Basic 6 (Anterior)
C8	Kulzer Basic 8 (Posterior)

- 3-Layer-Tooth Classic Range (Except For 0° Posteriors Moulds)
- Manufactured by Kulzer Germany
- Shades: 16 VitaPan Shades (A1 D4)
- Moulds: 14 Upper and 7 Lower Anterior Moulds, 7 Upper and 7 Lower Posterior Moulds

Posterior Options:

- Basic 8 / 0° Degrees
 - o Multi-layered posterior tooth, flat plane occlusal surface
- Basic 8 / 12° Degrees
 - o Multi-layered posterior tooth, main application full dentures
- Basic 8 / 33° Degrees
 - o Multi-layered posterior tooth, main application partial dentures

ACRYLIC TEETH – KULZER DELARA

Delara - Kulzer (3 Layer Tooth - Incomp CAD CAM Technology)

Everybody's Delara – a modern all-round tooth line for everyday use with lifelike aesthetics.

Code	Description	
D6	Kulzer Delara 6 (Anterior) – 1 Card	
D8	Kulzer Delara 8 (Posterior) – 1 Card	
KD-LMC	Kulzer Delara Living Mould Case – Shade A3 – 23 Ants / 8 Posts – Aluminium Box – 1pc – 66077519	
KD-SA	Kulzer Delara 6/8 Small Assortment Intro Case – Includes shades A2/A3 – 48 Anteriors / 36 Posteriors – Cardboard / Plastic Draw Case – 1pc – 66077520 – LIMITED TIME OFFER – 1 Per Customer Only – Pay full RRP for Anteriors and receive Posteriors free + 1 x Shade Guide – No further discount.	

Delara is Kulzer's new line of prosthetic teeth, a single tooth line that meets every need of dental laboratories – delivering aesthetics, form and function, with a lively surface structure and unique layering, along with modern and bright shading for a fresh and vivid appearance.

- 3 Layer Incomp Cad Cam
- Shades Available: A1 D4 + 2 Bleach Shades BL2 / BL3
- 18 Upper / 5 Lower Anterior Moulds
- 8 Posteriors Moulds
- Made by Kulzer Germany

Advantages of Delara:

Easy handling for predictable results: freedom during set-up without excessive grinding or changing the basic shape and layering effects. The polishing buffer, basal grinding reserve and optimized incisal edge simplify the set-up process.

Flexibility: full range of shades, process-optimized and anatomical forms, excellent functionality and beauty for all indications and set-up options.

Aesthetics: blueish effect for a fresh and lively appearance, along with modern shading, a vivid surface structure and dynamic light refraction

Value for money: one tooth line for all indications for everyday use.

ACRYLIC TEETH – WRIGHTS SENATOR

Senators (3 Layer Tooth)

Code	Description
A6	Senator (Anterior)
A8	Senator (Posteriors)

- 3-Layer-Tooth
- Manufactured by Wrights Health Group Scotland.
- Shades: 12 VitaPan Shades (A1-A4, B2-B4, C2-C4,D3)
- Moulds Available:
 - 11 Upper and 6 Lower Anterior Moulds / 6 Upper and 6 Lower Posterior Moulds
 - o Upper Anteriors Moulds

Square Moulds: 2D, 3D, 4HU, 136
 Ovoid Moulds: 3NU, A25, A26, 3PU, 3X
 Tapering Moulds: 5P, 267

- Lower Anteriors Moulds: 2E, 3PL, 4HL, 3NL, 3R
- Posteriors Moulds:

■ Functional Moulds: 2, 4, 11S, 13S

33° Moulds: 16, 18

KULZER - PALA Digital and CAD CAM Info

Kulzer digital - PALA Teeth digital files with 3Shape

Mondial and **Premium** CAD CAM teeth moulds can be accessed using 3 Shape design software and used to design digital dentures.

A subscription license is required by the software owner to print or mill using this intellectual property. The Kulzer license needs to be purchased from Kulzer Australia directly by contacting Kulzer Australia +61 2 9153 0311 or sales.mckulzer@kulzer-dental.com

The physical cards of teeth is then still purchased direct from Durodent as your Kulzer dealer.

The advantage with Kulzer digital files and CAD CAM teeth over competitors' teeth is that the physical tooth cards is genuinely CAD CAM manufactured which means the physical tooth with fit exactly with the milled / printed denture base without adjustments and grinding in required.

DENTURE ACRYLICS — KULZER

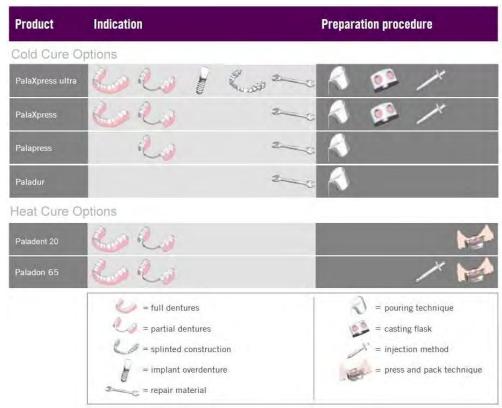

PALA DENTURE ACRYLICS – FROM THE INVENTOR OF DENTURE

ACRYLICS OVER 75 YEARS OF EXPERIENCE AND INNOVATION

Kulzer look back on 75 years of success in the denture acrylic sector and is indispensable to the market as the inventor of denture acrylics.

Kulzer continues to develop and improve their products. The PALA range has always combined high durability, colour stability, mucous membrane tolerance and great aesthetics, whilst including a worldwide range of products for all segments and indications. Kulzer denture acrylics can offer 25 year colour stability across most of the range.

PALA acrylics have set the standard for exceptional flexural strength characteristics. All the Kulzer denture acrylics and teeth are BIO-Compatibility certified.

Compact Knowledge: Heat Curing and Cold Curing

Heat and cold-curing acrylics have very different chemical and physical characteristics. Dentures made from heatcuring acrylics reach their final material values directly after polymerization.

Cold-curing acrylics, on the other hand, "improve" their characteristics within the following 12-24 hours. That is why these dentures should be placed in warm water after fabrication – ideally over night. This way, the patient receives a denture at its functional and compatible best from the very start.

DENTURE ACRYLICS – HEAT CURE (PRESS PACK)

(PMMA - Poly Methyl Methacrylate also known as Acrylic)

Paladent 20 Heat Cure by Kulzer

Its well-balanced properties make it economical to use and guarantee high-quality dentures at a reasonable price.

Code	Description		
HP20-R50	Kulzer Paladent 20 Powder, 1kg, R50 Veined #4, 64707776		
HP20-PV	Kulzer Paladent 20 Powder, 1kg, Pink Veined #3, 64710147		
*** For CLEAR	*** For CLEAR heatcure acrylic refer to Meliodent Heatcure CLEAR (Meliodent powder can		
be used with P	be used with Paladent liquid) or Paladon 65 CLEAR (need to use matching Paladon Liquid)		
below.	below.		
HP20-L	Kulzer Paladent 20 Liquid, 500ml, 64707772		

Information

- Its plastic consistency allows the putty to be packed very easily.
- Very long working time of up to 30 min, allowing the production of several dentures simultaneously
- Excellent colour stability and a low residual monomer
- Cadium Free
- Curing Time: 20 mins
- Suggested Process: Place clamped flask in boiling water for 20 mins with exception to thick lower dentures. Bench cool for at least 10 mins, then immerse in cold water.
- Indication: Complete Dentures & Partial Dentures (Colour match with Palapress / PalaXpress or Paldur for repairs)
- Fabrication Technique: Press and Pack Technique

Hot Classic Heat Cure by AcrylX Germany

Simple processing, high accuracy and high quality results guaranteed, excellent mechanical properties, optimal mucosal tolerance due to low residual monomer content, physiological shades and absolute colour stability, Cadmium free, evaluated and certified biocompatibility.

Indication: Complete Dentures & Partial Dentures (Colour match with Prime or Acrylx Repair for repairs)

Swelling Phase: Approx 10 Min – Processing Phase: Approx 30 mins.

Polymeriasation: Normal or long term.

Code	Description
AX-HC-V5	AcrylX Xthetic Hot Classic Powder, V5 Pink Veined, 1000g
AX-HC-L500	AcrylX Xthetic Hot Classic Liquid, 500ml

Meliodent Classic Heat Cure by Kulzer

Code	Description
HMH-65V	Kulzer Meliodent Heatcure Powder, 1kg, H5 Veined #65, 64713271
НМН-С	Kulzer Meliodent Heatcure Powder, 1kg, Clear, 64713213
HMH-L	Kulzer Meliodent Heatcure Liquid, 500ml, 64713308

Information

- 33% more impact resistance than standard 20 min cure acrylics
- Natural Colour (Blueish purple tints with translucency)
- Well balanced properties make it economical to use and guarantee high quality dentures
- Process easily without additional equipment
- Good colour stability and a low residual monomer
- Cadium Free
- Reaches its packable consistency after approx. 10 minutes, the processing time is approx. 25 minutes. The processing time is extended or reduced depending on the ambient temperature.
- Dough Time: 6.5 minutes at 23°C, Curing Time: 30 minutes
- Suggested Process: Place clamped flask in water, bring to boil slowly over 5 mins, boil for 25 mins. Bench cool for at least 10 mins, then immerse in cold water.
- Indication: Complete Dentures & Partial Dentures (Colour match with Meliodent Rapid Repair for repairs)

Fabrication Technique: Press and Pack Technique

R50 Veined #4 Pink Veined #3 (Rosa)

DENTURE ACRYLICS — HEAT CURE HIGH IMPACT

Paladon 65 - Kulzer

The Legendary Heat Curing Denture Acrylic

Heat-curing resin for the creation of high-quality dentures. The plastic consistency makes sure that the dough can be stuffed extraordinarily well. (PMMA - Poly Methyl Methacrylate also known as Acrylic)

Code	Description
HP65-R50	Kulzer Paladon 65 Powder 1kg, R50 Veined #4, 64707711
HP65-PV	Kulzer Paladon 65 Powder 1kg, Pink Veined #3 (Rosa), 64707708
HP65-C	Kulzer Paladon 65 Powder 1kg, Clear #7, 64707710
HP65-L	Kulzer Paladon 65 Liquid, 500ml, 64707674

Information

- Long term stability, high colour stability, cadmium free, certified biocompatible, low residual monomer
- High strength acrylic
- Cadmium Free
- Curing Time: 90 Minutes Long Cure
- Suggested Process: Bring up to 70°C and hold for 60 mins, increase to boiling point for 30 mins. Turn off and allow cooling for 20 mins. Bench cool
- Full Dentures, Partial Dentures, Extensions, Indirect Relines (Colour match Palapress / PalaXpress or Paladur for repairs)

Fabrication Technique:

- Press and Pack Technique
- Injection Technique With Palajet

Xthetic High Impact Heat Cure by AcrylX Germany

High Impact Denture Base Resin, short-term heat-curing. Acrylic resin for the manufacture of removable or fixed dentures by using the packing and pressing technique as well as the injection technique.

Indications:

- Manufacture of total and partial dentures using the packing and pressing technique
- Manufacture of total and partial dentures using the injection technique
 - o Colour match with **AcrylX Xthetic Prime** Repairs / Additions

Product features:

- Very high impact strength
- Flexural Strength 75Mpa
- Fast 20 minute cure rather than the usual 90 minute cure
- High accuracy and high quality results guaranteed
- Excellent mechanical properties
- Optimal mucosal tolerance due to low residual monomer content
- Physiological shades and absolute colour stability
- Cadmium free
- Evaluated and certified biocompatibility

Mixing Ratio: 10g Powder: 4g-5g (4.25ml) Liquid

Processing times: Swelling phase: approx. 10 min, Processing phase (packing / pressing): approx. 15 min, Processing phase (injection): approx. 5 min

Polymerisation: This material can be polymerised successfully by:

Quick 20 Minute Cure Method (bring to boil 95°C + and polymerise for 20 minutes, rather than the normal 90 mins. Bench cool or Traditional High Impact Long Cure Method (Bring up to 70°C and hold for 60 mins, then increase to boiling point for 30 mins. Turn off and allow cooling for 20 mins. Bench cool)

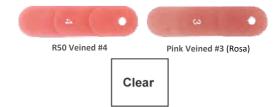

If processing thick lowers or dentures with thick areas, as with all heat cure acrylics just make sure the temperature is brought up slower to 70°C for 30 - 60 minutes, then increase to boiling for 30 minutes to provided time for the whole flask to reach even temperature throughout and allow even polymerisation to reduce the chance of porosity occurring.

Pink V (O2) Veined – Great colour for high impact – Slightly darker pink veined / Colour match with AcrylX Xthetic Prime for Repairs / Additions

Code	Description

Palapress by Kulzer Germany (Colour Stable)

Top selling High grade colour stable cold curing (self cure) acrylic resin with short processing time.

The casting time is 2 minutes and the total processing time 7 minutes. Cadmium-free.

Indications (Material Uses): Partial Dentures, Repair Material, Splint Adjustments (Clear) (Colour match with Paladent 20 or Paladon 65 Heatcure)

Advantages:

- High fitting accuracy
- Certified biocompatibility
- Very good mucosa tolerance due to low residual monomer contents
- Colour-stable due to catalyst system

Process: Palapress is pourable for 2 min after mixing. After 4 min Palapress reaches a dull plastic phase of about 3-3.5 min, during which Palapress is stable and will not flow. **Optimum polymerization** without air bubbles is made in the Palamat pressure curing unit at 55 °C and 2 bars pressure for 20 min. Until intraoral placement, store denture in water.

PalaXpress by Kulzer Germany (Colour Stable)

Top selling High grade colour stable cold curing (self cure) acrylic resin with longer processing time than Palapress. Suitable for injetion technique.

Injectable universal denture material with high fitting accuracy. PalaXpress offers the same benefits as Palapress but has an extended working time of 14 mins depending on room temperature, designed for the Palajet injection unit.

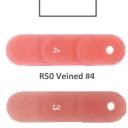

Indications (Material Uses): Full Dentures, Partial Dentures, Repair Material, Injection Technique, Splint Adjustments (Clear) (Colour match with Paladent 20 or Paladon 65 Heatcure)

Process: At 23 °C PalaXpress is pourable for approximately 3 min after mixing. 4 min after mixing it goes into the plastification stage for 7 min. For the polymerization place the model in the Palamat and cure at 55 °C and a pressure of 2 bars for 20 min.

KULZER DENTURE ACRYLICS – COLD CURE HIGH IMPACT

HIGH IMPACT Cold Cure / Self Cure (Colour Stable)

PalaXtreme - HIGH IMPACT Cold Cure (Colour Stable)

NEW 2020 -Replaces PalaXpress ULTRA Jan 2020

High-impact, self-curing acrylic for every indication. Cold-curing resin PalaXtreme – Incredibly Strong & Gentle.

With PalaXtreme you get high-impact strength, excellent handling characteristics and allergy friendliness. The "core shell technology" minimises the risk of fractures.

This high-impact, self-curing denture acrylic offers labs great flexibility, and it is just as easy to use as – or even easier than – conventional autopolymerising materials, whether you prefer the pouring or the injection technique. The acrylic also minimises the risk of allergies for users and patients – proving that it is both strong and gentle at the same time.

Information

- High fracture resistance due to additives that bond firmly and evenly
- Colour stable due to catalyst system
- Passes both ISO 20795 tests of maximum stress intensity (2.39 MPa*m1/2) and total fracture of work (1,128 J/m²)
- Minimises need for warranty repairs, even for implants
- Easy handling for all indications
- Suitable for injection & pour technique
- Allergy friendly with extremely low residual monomers (2.03%)
- For the manufacturing of dentures to withstand highest strain.
- Cadmium-free.
- Procedure: Due to the higher material properties, material is requiring slightly different treatment to normal selfcures.
 - Pouring Mixing Ratio: 10g Powder: 6g Liquid / Injection Mixing Ratio:
 20g Powder: 12g Liquid
 - Mixing Time: Mix very well for minimum 30 seconds (up to 1 minute) -Use Timer. It will be like wet sand, quite stiff. Form a homogenous mass.
 - o **Injecting:** Once material has a dull surface.
 - Pouring: Can be poured about 3 min after mixing at a room temperature of 23°C; after 6 min, a plastic phase lasting approx 3 min is reached
 - Polymerisation: Allow bench cure for min 7 mins / max 13 min.
 Surface should be dull. Polymerisation In pressure vessel: 30 Mins,
 Water Temp 55°C, Pressure: 2 bar.
- Indications: Full Dentures, Partial Dentures, Implant Overdenture, Complete Model Cast Prosthesis, Splint Construction, Repairs. (Colour matches with Paladent 20 Heatcure or Paladon 65 Heatcure)

DENTURE ACRYLICS — COLD CURE colour stable

Xthetic Prime by AcrylX Germany

(Colour Stable High Grade Selfcure)

High Grade Colour Stable Selfcure Acrylic for all pouring techniques.

Indications (Material Uses): Full Dentures, Partial Dentures, Repair Material, Splint Adjustments (Clear). (Colour match with Heat Cure versions - Hot Classic / High Impact)

Acrylic resin for the manufacture of removable or fixed dentures by using the pouring technique and agar cast system.

Processing: Saturation phase: 30 sec - Pouring phase 3 mins - Plastic phase 3 min – Polymerisation (2-3 bar, 45-50°C) approx. 15 mins

Xthetic Prime EXTRA (Inject) by AcrylX Germany (Colour Stable High Grade Selfcure)

High Grade Colour Stable Selfcure Acrylic for all techniques including Injection technique.

Indications (Material Uses): Full Dentures, Partial Dentures, Repair Material,
Splint Adjustments (Clear). (Colour match with Heat Cure versions - Hot Classic / High Impact)

Acrylic resin for the manufacture of removable or fixed dentures by using the pouring and injection technique. Has a shorter working time and is more positional stable earlier to enable pouring several saddles in one working step.

Processing: Saturation phase: 30 sec - Pouring phase 2.5 mins - Plastic phase 5 min - Polymerisation (2-3 bar, 45-50°C) approx. 15 mins

SELLING OUT ALL PRIME EXTRA – We found learning the product that **Extra** and Prime are pretty much the same so we dont want to sell / stock both.

AX-XR-V5	AcrylX Xthetic Repair Powder, V5 Pink Veined, 1000g
AX-XR-L500	AcrylX Xthetic Repair Liquid 500ml

Paladur – Repair Acrylic by Kulzer

Cold-curing resin for denture repairs. Not colour stable.

Indication: Repair material. Colour matches Kulzer heatcure acrylics – Paladent 20, Paladon 65

Advantages: Very easy processing, Safe and fast polymerisation, Good chemical bond, Can be used without pressure polymerisation unit, Shade adjusted to all Kulzer denture resins, Low polymerisation shrinkage. Cadmium-free. Efficient stackable (apply and cure in layers) denture repair acrylic.

Processing: Curing time at surrounding room temperature of 23°C approximately 9–12 min. Optimum polymerization without air bubbles can be made in the Palamat pressure curing unit at 55 °C and 2 bars pressure for 10 min. If larger quantities are used, and a pressure cure unit is not available, Paladur must be applied in layers. Each layer must cure individually and cooled down completely before new dough is applied.

DENTURE ACRYLICS – COLD CURE WITH FLEX

FLEXIBLE PARTILE DENTURE ACRYLIC

DuraFlex Flexible Partial Denture Material – Reliance Dental

DuraFlex is a partial denture material with flex that is suitable for short / medium term applications (not recommended for long term use in all applications) Not suitable for all applications. Even though this material is for short to medium term indications often patient comfort outweighs material life.

Requires diotoric holes in teeth and mechanical retention. Life of material is variable depending on application and care. It offers patients a device with great comfort due to the material properties. A modified composite resin that can easily be repaired or relined unlike conventional nylon materials.

Processing: Treated like a selfcure acrylic – IMPORTANT: Temperature must not be above 53°C deg

- Pouring Method (45 minutes @ 53°C deg / 2 Bar Pressure)
- Press-Pack Method (2 Hours @ 53°C deg)
- Repairable with same material.

Youtube videos that explains diatoric holes and process with similar another brand material: https://www.youtube.com/watch?v=TCaMh5uG5bg or https://www.youtube.com/watch?v=TCaMh5uG5bg or https://www.youtube.com/watch?v=RFP-u7eJoQE

DENTURE ACRYLICS – ORTHODONTIC

ORTHODONTIC ACRYLIC

Meliodent Orthodontic Acrylic - Kulzer

(PMMA - Poly Methyl Methacrylate also known as Acrylic)

This self curing acrylic meets the specific demands in orthodontics as a particularly stable material in the *salt and pepper technique*. This allows orthodontic appliances to be made in a fast and efficient way. Cadium Free.

Benefits: Increased polymer bead penetration ensures quicker easier working and a stronger and more rigid cured acrylic base allowing stresses to be better absorbed. Minimum deformation change on polymerisation

Handling: Sprinkle powder in a thin layer onto the model and drip liquid onto the powder until the powder is saturated. Add more powder and repeat the process until the desired thickness is achieved. Adding too much liquid at once will result in excess flow. This can be controlled by adding more powder. The correct proportions of powder and liquid create a firm consistency with adequate control of flow. Excess material can be trimmed from the model with a sharp instrument during this "dough" stage. Meliodent Orthodontic has a working time of approximately 5 to 7 minutes at room temperature.

Curing Time: Cure the material in a Palamat/Palamat elite / Palamat Premium at 55°C, 2 bar for 10 minutes

OrthoXin Orthodontic Acrylic - AcrylX

(PMMA - Poly Methyl Methacrylate also known as Acrylic)

Acrylic for making orthodontic appliances. The material was specially developed for use in the spraying / sprinkling process, but is also conditionally suitable for use in the dough process.

This self curing acrylic meets the specific demands in orthodontics as a particularly stable material in the *salt and pepper technique*. This allows orthodontic appliances to be made in a fast and efficient way. Cadium Free.

Benefits: Increased polymer bead penetration ensures quicker easier working and a stronger and more rigid cured acrylic base allowing stresses to be better absorbed. Minimum deformation change on polymerisation

Handling: Sprinkle powder in a thin layer onto the model and drip liquid onto the powder until the powder is saturated. Add more powder and repeat the process until the desired thickness is achieved. Adding too much liquid at once will result in excess flow. This can be controlled by adding more powder. The correct proportions of powder and liquid create a firm consistency with adequate control of flow. Excess material can be trimmed from the model with a sharp instrument during this "dough" stage.

Mixing Ratio: 10g powder with 5g liquid (when used as dough process)

Curing Time:

Swelling phase: 30s

Beginning of plastic phase from: Approx 3 - 3.5 mins End of plastic phase after: Approx 10 - 15 mins.

Cure the material under pressure in a Palamat/ Palamat elite / Palamat Premium or similar at 40°C, 2 bar for 10 minutes

TOOTH SHADE DENTURE ACRYLICS

Xthetic Temp Tooth Shade Acrylic by AcrylX Germany

High quality colour stable Crown and bridge resin, self cure tooth shade acrylic. For the indirect, extra-oral manufacture of crowns and bridges as well as the backing and fixing of veneer shells on metal frameworks.

Advantages:

- Excellent strength high quality C&B grade tooth acrylic
- Colour Stable
- High Abrasion Resistance

Indications:

- Indirect, extra-oral manufacture of crowns and bridges
- Backing veneer shells
- Fixing veneer shells on metal frameworks
- Fixing milled acrylic teeth on metal frameworks
- Additions and repairs of acrylic teeth

Mixing ratio: 10g of powder with 4-5g of liquid

Processing times: Swelling phase: approx. 1 min, Pouring phase: approx. 2 min, Plastic phase: approx. 5 min – Polymerisation: The material polymerises at room temperature after approximately 8-12 minutes. Polymerisation (2-3 bar, 45-50°C) approx. 15 mins

PalaVeneer Dentine - Kulzer

(PMMA - Poly Methyl Methacrylate also known as Acrylic)

Colour stable, superior self curing tooth shade acrylic for PalaVeneer process, interim work in crown and bridge procedures as well as dentures.

*** Replacement Product: For Palavit 55 VS – Same product rebranded and expanded

PalaVeneer Dentine is a colour stable, self-curing, tooth coloured PMMA prosthetic acrylic particularly suited to fix PalaVeneer veneer shells. PalaVeneer Dentine distinguishes itself through excellent processing properties. Together with PalaVeneer veneer shells, the technician obtains a perfect, Premium-identical layering in the anterior region. PalaVeneer Dentine was modified with the proven NanoPearls® material for maximum abrasion stability and fracture-resistance.

Indications:

- Fixing and backing PalaVeneer veneer shells on metal frameworks
- Fixing and backing milled acrylic teeth on metal frameworks
- To restore/bond facets
- To produce long term temporaries (facet technique)
- To aesthetically finish pre-fabricated teeth

Shades: A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C1, C2, C3, C4, D2, D3, D4, Incisal.

ACRYLICS MISCELLANEOUS

TOOTH BONDING

Kulzer Palabond – the reliable bond between denture material and acrylic denture teeth. Functional and durable dentures need a stable and secure bond between denture material and denture teeth. Used consistently, Palabond transparent bonding agent prevents denture teeth from breaking off. Palabond increases the bond between denture teeth and denture base, as well as the bond between repair material and base material.

AcrylX Xthetic BOND – exhance bonding strength between denture material and acrylic denture teeth.

AX-XB	AcrylX Xthetic BOND Liquid 30ml

DENTURE SEALANT

Kulzer Palaseal - Light Cured

Palaseal is a light-curing, transparent sealing resin that bonds to any denture materials, temporary crowns and bridges. Prevents plaque and food residue build-up, high surface hardness and abrasion resistance, solvent resistance to denture cleaners, and provides a smooth surface with no polishing required. *Must be cured in Kulzer HiLite Power light box to be successful

Pressure Connection: Max. 10 bar

Nominal Pressure: 4 Bar Plunger Rate: 0 - 50mm / sec

Pressing Force On Cylinder: 2kN = 200kP

Palaiet Injection System

Weight: 13.5kg

WATCH THE PROCESS ONLINE

Pneumatic injection unit for fabrication of full and partial dentures is adapted especially to suit material properties of PalaXpress, PalaXpress ULTRA, Paladon 65 (Heatcure).

The Palajet is extremely easy to use. The closing system avoids errors and therefore achieves consistent processing properties.

During the pneumatic injection process the denture acrylic is forced, under pressure, into the flask. The flask is filled in a controlled system from bottom to top, avoiding air bubbles and voids. The flask remains in the Palajet for a further 5 minutes (cold cure), before the final polymerisation in the Palamat Premium unit.

The results speak for themselves in terms of quality and economical processing. High quality full dentures produced this way have many advantages over those processed in conventional methods eg. No raised bite, resistant to breakage, exact fit and virtually eliminates adjustment.

- Precision engineering for injection denture fabrication
- For injection of heat-curing and cold-curing acrylics
- No increase in the vertical dimension
- Hardly any finishing needed
- Maintenance-free, effortless operation

AcrylX reBlanX Acrylic

Special Acrylic designed especially for refilling CAD / CAM milling blanks in the dental laboratory. Cold-curing resin for milling denture puck blank refills.

Indication: Full and Partial Denture Base

Colour match for other AcrylX acrylics Hot Classic and High Impact. Colour Stable

Indications

- Production of bite splints in the CAD / CAM process
- Production of denture bases in the CAD / CAM procedure

Properties

- universal application, can be used to refill all PMMA blanks
- very simple processing, optimum chip behaviour during milling
- optimal mucous membrane compatibility due to low residual monomer content
- minimal shrinkage, no tension inside the material thanks to controlled polymerization
- homogeneous surface, very low plaque susceptibility
- simple workability and polishing
- absolutely colour-stable and cadmium free
- tested and certified biocompatibility

Mixing ratio: 10g powder with 5-6g liquid

Processing times: Swelling phase: approx. 30s / Casting phase: approx. 2-3 min / Plastic-modulable phase: approx. 5-7 min

Polymerisation: The polymerisation takes place under a pressure of 2-3 bar and a water temperature of 55 $^{\circ}$ C for about 30 min.

To dye: The polymer is available in colourless. Coloured monomers are available in: pink, red, petrol, magenta, light blue, neon-red, neon-orange.

Note: Due to the lack of normative requirements, the classification according to product standard for denture plastics, DIN EN ISO 20795-1, type 2 class 1 and according to MPRL 93/42 / EWG annex IX, class IIa for removable and fixed dental restorations.

DENTURE ALLOY

Heraenium® Co-Cr Metal-Ceramic Alloys

Heraenium alloys are high grade alloys for cobalt chrome work. They are free of additional nickel traces and their composition is well matched to provide for high strength yet retain a degree of elasticity. They cast well and exhibit excellent flow as well as mould filling properties. The cobalt chrome frameworks are easily polished to a high lustre.

INVESTMENT MATERIALS

Investment For Cast Partial Dentures – CoCr Chrome Cobalt

Kulzer - Moldavest[®] Master

Moldavest Master is a phosphate bound, graphite free precision investment material for model casting for the entire cast partial denture in cobalt chromium (CoCr) and precious metal.

Particularly suitable for silicone and also gel duplication and is used in the classic, conventional program pre-heating.

Use with Heraform-Silicone duplicating materials with shore hardness between 20 and 26.

Code	Description				
нн-мм	Kulzer Moldavest Master, 45 Bags x 450g (20.25kg), 6600 9782				
	Use with Kulzer Investment BS Liquid 1. Refer Below.

Investment For C & B Precious and Non Precious Metal

Kulzer - Heravest Speed

Conventional phosphate bonded graphite free C & B investment material for speed preheating and for crown and bridgework.

Indication: Inlays, Partial crowns, crown, small bridges, tapered crowns, telescope, large bridges

Advantages - Extra-smooth surfaces, Highest precision, Precise fit casts, Suggested for the transfer technique 900 > 700°C

Code	Description				
HH-HVS	Kulzer Heravest Speed, 4.5 kg, Containing 75 x 60g bags, 6603 6741 Use with Kulzer Investment BS Liquid 1. Refer Below.				

HERAVEST Speed HERAVEST Speed O S KULZER

Kulzer - Moldavest® Exact

Phosphate bonded, graphite free C & B non precious metal investment material for crown and bridgework.

BONDING LINER AGENTS - KULZER SIGNUM

Signum Metal Bond - Metal to Acrylic Bonding Agent

Metal-resin bonding agent for crown, bridge and partial denture technique.

- Wide areas of application (acrylic dentures/composite)
- Due to cold adhesion bonding it is suitable for restorations with a chair side application
- Up to 300% better adhesion of composite and acrylic material to precious, non-precious metal alloys and titanium
- The bonding agent is extremely resilient and remains strong for a long period of time.
- Can be used on all Precious, Non -Precious metals including Titanium

Metal Bond I (Bonding Liner Primer)

- Bonding of methacrylate acrylics to metal Use Metal Bond I
- Air dry bonding liner. One step etch and bond. Self cure application.
- Ensure good bonding between metals and MMA/PMMA resins to be used for dentures.
- Effective in repairing Co-Cr or Ni-Cr based metal dentures, and resin dentures with clasps, wires etc.
- Instructions: Sandblast the surface to be faced with min. 110 μm Al2O3 at 3 bar pressure (non-recyclable abrasive). Then clean with uncontaminated (oil free) compressed air or clean tap water (do not steam clean) and dry thoroughly. Dispense an ample amount of Signum metal bond I into a mixing dish. Apply to the prepared surface with a fine brush and allow to air dry. Apply a second coat if necessary.

Code	Description
HS-MB1	Kulzer Signum Metal Bond I (Bonding Liner), 4ml, 66033915
	(Comparable product to Meta Fast Bonding Liner etc)

Metal Bond II - Light Cured Opaquer

- ** MUST BE CURED USING HIGH POWERED LIGHT BOX LIKE KULZER HILITE **
- For quick masking of metal structures before adding acrylic or composite (Light cured)
- Bonding of composite to all metal framework surfaces Use Metal Bond I & II
- Instructions: Shake well and polymerize for 90 sec. with high powered lightbox like Heraflash, HiLite power or UniXS. For intraoral use: Polymerize Signum metal bond II for 40 seconds with a dental polymerization lamp / wand (e.g. Translux®). For an optimum bond apply the relevant opaquer without undue delay and without contaminating the surface by touching it. Then apply the composite or acrylic.

	** BOND II MUST BE CURED USING HIGH POWERED LIGHT BOX LIKE KULZER HILITE **				

Metal Bond I & II Set

The "2 bottle system" provides an extraordinary adhesive force between the alloy and the veneering composite.

	Code	Description
	HS-MBK	Kulzer Signum Metal Bond Set I + II, 2 x 4ml, 66033913
		** BOND II MUST BE CURED USING HIGH POWERED LIGHT BOX LIKE KULZER HILITE **

Other Bonding Agent Guide:

- Bonding composite to composite Use Signum Liquid 6471 4198 Refer To Page 28
- Bonding composite to acrylic Use Signum Connector 6471 4211 Refer To Page 28
- Bonding acrylic to composite Use Palabond 6470 8082 Refer To Page 21

Signum Zirconia Bond – Zirconia / Composite Bonding Agent

The bonding agent for the material combination zirconium dioxide + Signum composite or ceramis.

It ensures absolute safety through a strong adhesive bond. Benefits at a glance: strong adhesion bond to zirconium oxide material, compatible with all zirconium oxide frameworks, supports the bond to composite cements for delivery of a zirconium oxide restoration (e.g. Maryland bridges, primary crowns)

Signum Ceramic Bond – Ceramic Bonding Agent

2 Step Bonding agent for Silicate Ceramic

Fast and efficient to use, Signum ceramic bond can be used as a bonding agent for seating full ceramic restorations and for repairing chipped ceramic restorations using direct filling composite.

Benefits at a glance: Intraorally or extraorally, polymerisation not required in intermediate steps, very high bonding values and long life (typical values above 30 MPa as specified by DIN 10477)

đ١	nd folig life (typical values above 50 MPa as specified by DIN 10477)

HS-CE-EN	Kulzer Signum Ceramis Enamel, 1 x 4g, 6602 29** Available Colours: EL, EM, ED

Refer to Kulzer lab catalogue for exact product codes

Signum Opaque F

Light curing fluorescent single component. Signum opaque F is used for the colour masking of metal frames.

** MATERIALS AND COMPONENTS MUST BE CURED USING HIGH POWERED LIGHT BOX LIKE KULZER HILITE **

Code	Description
HS-OF	Kulzer Signum Opaque F, 1 x 3g, 660200**
по-Ог	Available In All Shades A1 – D4, OP (Opaque Pink), OR (Opaque Red)

Signum Accessories

Signum Connector - Light curing bonding agent between prosthetic acrylic materials and light curing veneering materials. For individual colour and shape modifications on ready-made dentures. For the individual colouring of prosthetic based acrylics. ** MUST BE CURED USING HIGH POWERED LIGHT BOX LIKE KULZER HILITE **

Signum Insulating Pens (Like Renfert Iso Stift)- A two component isolation to separate gypsum/plaster or epoxy resin

from the veneering composite material and ceramic. **Pen I** – Closes the micro pores on the plaster surface.

Pen II – Forms an extremely thin separating film that allows a high fitting accuracy.

Signum Insulating Gel - Universally-compatible insulating gel. Isolation of modelling materials from materials. Application prior to final polymerisation prevents the creation of a dispersion layer on t Signum HP Paste - Polycrystalline paste to polish composite materials. Microfine diamond abrasive high-filled composites to a durable high lustre.

Signum Liquid - Processing aid for modelling and reproducing the dispersion layer. Bonding composite to composite.

LC CHARACTERISATION - KULZER SIGNUM

Signum Cre-active – Tooth Characterisation

Characterisation of restorations and for the modification of denture teeth

Signum cre-active is the creative module for characterising and simulating prominent details such as white striations, enamel cracks, etc. With the colour fluids of Signum cre-active, amazing individualised characterisations can be achieved and restorations are perfectly matched to the adjacent teeth. Requires Signum Connector adhesive and Signum Liquid (Refer to page 28). Cures in light polymerisation unit (Uni SX, Heraflash, HiLite Power).

** MATERIALS AND COMPONENTS MUST BE CURED USING HIGH POWERED LIGHT BOX LIKE KULZER HILITE **

Code	Description
HS-CA-S	Kulzer Signum Cre-active Set Assortment, 6603 3446
по-са-о	8 x Cre-active 3g, 2 x Cre-active Transparent 3g, 20 x Tips and Caps 1.2mm, 2 x Stain Brush, 1 x Cre-actve shade guide
HS-CA-R	Kulzer Signum Cre-active Colour Refills, 1 x 3g, 6602 00** Available In: White, Polar, Umbra, Corn, Mango, Caramel, Maroon, Black
HS-CA-TR	Kulzer Signum Cre-active Transparent Refills, 1 x 3g 6602 00** - Available In: T1, T2

Light Cured Colourfluid System For Custom Characterisations Of Dentures

These light-curing colourfluids in combination with the Signum connector for heat-curing and cold-curing resins are particularly suitable for customised characterisation of full and partial dentures and implant-retained dentures.

The PALA cre-active colourfluids are mixed into the PALA cre-active gingiva material as colour intensifying agents. Can be cured up to 2mm thick.

Preparation

Single component material. Requires Signum Connector adhesive (Refer to page 28). Cures in light polymerisation unit (Uni SX, Heraflash, HiLite Power). Pala Gingiva colours are the colour carrier and polymerisation curing material component.

Compatible Curing Light Lamps: HiLite Power (Kulzer), UniXS / Heraflash (Kulzer), Triad 2000 (Dentsply), SolidLite EX (Shofu), Spectramat (Ivoclar) – SEE INSTRUCTIONS FOR CURING TIMES for each machine

CHARACTERISATION - STAINS

Xthetic® denture fx

Gum / Denture Base Characterisation Stains

Intense Colours - Set

TIP: Colours are very intense, therefore it is best to mix some test batches for trial and error until you acheive your desired shading. eg. Mix lighter shades like ROSE or GINGIVA Pink Light with IVORY (Intense White Colour)Resin for individual colour characterization of full and partial dentures.

Resin for individual colour characterization of full and partial dentures.

Compatible to all common PMMA-based denture materials.

5g Starter bottles only available with the kit. Not individually

Code	Description

DENTAL STONES – MODEL STONE / YELLOWSTONE

Dental Stone (Yellowstone / Model Stone)

ISO Type 3

Excellent hardness and very low setting expansion make Type 3 yellowstones the ideal dental stone for most laboratory processing tasks.

Recommended for use in models and flasking, in the production of full or partial dentures, and in basing crown & bridge models.

Code	Description
PLG	Durodent Pros Stone, Box, 20kg #TOP SELLER PSI 8,500 (59Mpa) - Set Time: 11–14 Mins – Exp: 0.12% - Ratio:30ml/100g
PLG-5	Durodent Pros Stone, Pail, 5kg PSI 8,500 (59Mpa) - Set Time: 11–14 Mins – Exp: 0.12% - Ratio:30ml/100g
EH-L	Ernst Hinrichs Laborit, Yellow, 20kg Box #TOP SELLER PSI 8,500 (58Mpa) - Set Time: 10-12 Mins – Exp: 0.14% - Ratio:30ml/100g
РВ	Durodent Buff Stone, Box, 20kg – NSW ONLY PSI 8,000 (55Mpa) - Set Time: 10–15 Mins – Exp: 0.08% - Ratio 30ml/100g
PY	Gibling Yellowstone, Bag, 20kg PSI 6,000 (41Mpa) - Set Time: 10–14 Mins – Exp: 0.10% - Ratio 30ml/100g

Orthodontic Stone ISO Type 3

Ultra white colour for superior model presentation qualities for orthodontic models.

Code	Description
DOU-20	Durodent Orthostone USA, Ultra White, 20kg
	Type 3 – Dry PSI 9,000 (62Mpa) – Set Time: 13-15 Mins – Exp: 0.12% - Ratio: 30ml/100g - USA

DENTAL STONES – DIESTONES (HARD STONE)

Standard Diestones - High Strength (Hard) / Low Expansion Dental Stones

Recommendations for Chrome Cobalt models (10,000 – 13,000 PSI)

Perfect for **chrome work** and production of harder models for removable prosthesis.

Hinrizit® Super with a content of super hard stone, type 4. Special stone ideal for periodontal splints, model casting prosthesis, different regulations and for all indications where a regular hard stone is too soft and a super hard stone is too hard and expensive. Use recommendation: working and checkbite casts, acrylic dentures, repairs, relines, situation casts. Made In Germany

Code	Description
DCS-B-20	Durodent Chrome Stone, Blue , 20kg Box PSI 13,000 (90Mpa) - Set Time: 12 - 15 Mins – Exp: 0.15% - Ratio: 24ml/100g
DCS-B-5	Durodent Chrome Stone Diestone, Blue, 5kg Pail PSI 13,000 (90Mpa) - Set Time: 12 - 15 Mins – Exp: 0.15% - Ratio: 24ml/100g
EH-HSM-20	Ernst Hinrichs Hinrizit Super, Mint , 20kg Box PSI 10,200 (70Mpa) - Set Time: 10-12 Mins – Exp: 0.12% - Ratio: 26ml/100g

Recommendations For Crown and Bridge / Master Models

Code	Description
HMS-L	B Hera Moldastone CN, Light Brown , 18kg (4 x 4.5kg) PSI 9,500 (65Mpa) - Set Time: 12 Mins – Exp: 0.08% - Ratio: 22ml/100g
	1 31 3,300 (63Mpt) Set Time: 12 Mins Exp. 6.00% Natio: 22Min 1006

Resin Reinforced Diestone (Extra Hard) ISO Type 4-R

Resin reinforced natural gypsum die materials. **Perfect** for all Master Models, **crown and bridge applications** as well as **implant or precision attachment cases**. Resin additives eliminate brittleness and add superior external hardness. The exclusive Apex flow agent allows for excellent stackability, while promoting free material flow during vibration.

Code	Description	l
ARZ-T-10	Apex RZ10, Tan, 10kg	
ANZ-1-10	Dry PSI 18,500 (127 Mpa) – Set Time: 10 - 13 Mins – Exp: 0.10% - Ratio: 19ml/100g	

DENTAL STONES & PLASTERS

Dental Plaster

Generally used as a cheaper alternative to Yellowstone for flasking and mounting dental models to the articulators. Often mixed with other dental stones to make them softer or go further.

Boral – Standard grade dental plaster. Used for flasking and mounting dental moulds. Knife-setting time of 5-10 minutes. Can be mixed with a harder dental stone to adjust setting time and increase its strength. Colour: White.

Alamo S (Speed) or Alamo Standard Fine Natural Plaster – Fast Setting Superior fine white plaster. A quick-setting model plaster made from high-grade alabaster. Contains 20% dental hard stone. **Controlled expansion**. Easy to use. **Use recommendation:** Study models, planning models, diagnostic models, mounting dental models.

Superfine – High grade dental plaster. Smoother mix and **bright white in colour**. Preferred for Ortho model work.

Code	Description
BDP	USG Boral Dental Plaster, 20kg Bag Dry PSI 2,175 (15 Mpa) – Initial Set Time: 5-10 Mins – Exp: 0.05-0.25% - Ratio: 50ml/100g
	Ernst Hinrichs Alamo S (Speed) <i>Fast Set</i> Fine Plaster, Natural White, 20kg
EH-AS	Box Dry PSI 2,400 (17 Mpa) – Fast Initial Set Time: 5 Mins – Final Hardness Set: 11 Mins – Exp: 0.10% - Ratio: 50ml/100g

EH-A-N	Ernst Hinrichs Alamo Standard Set Fine Plaster, Natural White, 20kg Box Dry PSI 2,400 (17 Mpa) – Processing Time: 10-14 Mins – Final Set: 18-25 Mins – Exp: 0.29% - Ratio: 50ml/100g
	Superfine Special Dental Plaster 20kg Pag. Suited for White Ortho
SFP	Superfine Special Dental Plaster, 20kg Bag – Suited for White Ortho Models Dry PSI 1,450 (10 Mpa) – Intial Set Time: 10-15 Mins – Final Set: 25 Mins – Exp: 0.25% - Ratio: 50ml/100g

PUMICE & POLISHING MATERIALS

Pumice Like Acrylic Finishing Media - Pumice

Alternative

Unique abrasives to cut faster and smoother than pumice. One grit size does it all. No scratching or grooving. Requires no change in current technique and lasts longer than pumice type products. No odor or bacteria. White.

Code	Description
PS-A	Durodent Acrylpol (Resilience), 9kg – Same As Resilience

Pumice - Natural

Pumice – Pumice is prepared in various grits and is used for finishing and polishing in dentistry. Grey in colour. Product characteristics may vary due to geographic location of mining site for material.

Code	Description
DPN-M-20	Durodent Natural Pumice, Medium, 20kg (Garreco USA)
PN-M-4	Durodent Natural Pumice, Medium, 4kg

Polishing Compound & Paste

Vonax Compound – Finishing composition. Compound for finishing dental plastics. Polyester Lacquer Finishing

Renfert Saphir - High-luster polishing paste for precious metal and chrome-cobalt alloy crowns and bridges.

Pala Polish - High Shine polishing paste. Simultaneously removes scratches and leaves a high shine on dental appliances. No need for pumice. Dentures, Partial Dentures, Orthodontic Appliances, Composite Materials

Renfert All In One - Polishing paste for universal use, with a wide spectrum of diamond grain sizes. Quick, highgloss finish on various different materials such as lithium-disilicate, zirconium oxide, veneering and hybrid ceramics such as high performance polymers and veneering composites.

Renfert Lisi - Polishing paste specifically for lithium disilicate with an exactly coordinated amount of coarse diamond grit.

Signum HP Paste - Polycrystalline paste to polish composite materials. Microfine diamond abrasives, it quickly polishes high-filled composites to a durable high lustre.

Keystone Composite Polishing Bar produces a high shine on composite restorations. Also good for acrylic and metal. Chrome.

Code	Description
VPC	Vonax Polishing Compound Bar (For Acrylic), Beige, Approx 730g (1635-007)
R-SB	Renfert Saphir Paste Bar (For Alloys), Blue, 250g (5150000)
H-PP	Kulzer Pala Polish Cream Paste (For Acrylic and Composite), 80g Jar – 66067855
R-P-A	Renfert Polish all-in-one 18g (Ceramics wide spectrum of diamond grain sizes) 5100100
R-P-L	Renfert Polish LiSi2 10g (Course Grit) 5102000
HSA-HP	Kulzer Signum HP Paste, 10g, 6471 2537
KS-CP	Keystone Composite Polishing Bar – White – 1 Pound - 1660100

Model Surface Hardener & Spray

Self-hardening acrylic solution for hardening and sealing plaster models. Requires only one application or dip. Surface becomes very hard and water resistant.

Renfert Model Spray - Smooths and hardens the surface of investment models of chrome cobalt frames.

Code	Description
R-SH	Renfert Surface Plaster Hardener Solution, 125ml (17192000)

ABRASIVE MATERIALS FOR BLASTING

Aluminium Oxide

50um (270 Mesh) – Fine abrasive; gentle oxide removal / devesting, framework prep, removing cement. Recommended for Crown and Bridge applications.

110um / 125um (150 Mesh) – Medium abrasive; oxide removal / devesting; framework prep; surface conditioning with denture acrylics.

250um (60 Mesh) – Highly abrasive; heavy oxide removal / devesting. Recommended for Chrome Cobalt.

Ersnt Hinrichs – Made In Germany – Top quality best value.

Code	Description
EH-AO-50	Ernst Hinrichs Edelkorund Aluminium Oxide 50um, White, 5kg 100311
EH-AO-50-20	Ernst Hinrichs Edelkorund Aluminium Oxide 50um, White, 20kg
EH-AO-110	Ernst Hinrichs Edelkorund Aluminium Oxide 110um, White, 5kg 100301
EH-AO-110-20	Ernst Hinrichs Edelkorund Aluminium Oxide 110um, White, 20kg
EH-AO-250	Ernst Hinrichs Edelkorund Aluminium Oxide 250um, White, 5kg 100291
EH-AO-250-20	Ernst Hinrichs Edelkorund Aluminium Oxide 250um, White, 20kg

Renfert - Cobra

Code	Description
R-C-50	Renfert Cobra 50um, White, 5kg, 1594-1205
R-C-110	Renfert Cobra 110um, White, 5kg, 1583-1005
R-C-250	Renfert Cobra 250um, White, 5kg, 1585-1005

See Ernst Hinrich products above for new alternative

Code Description		
	HH-C-250	Kulzer Hera Corundum 250um, White, 6kg, 6460 0969

Glass Beads

Non – abrasive glass beads for smoothing and condensing of surfaces. Creates silky matt surface with no light reflection. For finest surface treatment of precious and non-precious metal alloys and acrylic finishing. Does not cause silicosis.

50um (400–200 mesh) – Surface condensing and satin-smooth high lustre on occlusal surfaces, in secondary units or inner surfaces of crowns; cleaning dentures (plaster/calculus); devesting (pressable ceramics/inlays)

100um (170–100 mesh) - Surface condensing, smoothing and polishing NPM; removing debris from dentures (plaster/calculus/ etc.)

Ernst Hinrichs - Glass Beads - Made In Germany - Top quality best value.

Code	Description
EH-GB50-5	Ernst Hinrichs Glasstrahlperlen Glass Beads, 50um, 5kg Canister 100341
EH-GB50-10	Ernst Hinrichs Glasstrahlperlen Glass Beads, 50um, 10kg Bucket 100343
EH-GB50-20	Ernst Hinrichs Glasstrahlperlen Glass Beads, 50um, 20kg (2 x 10kg 100343)

DENTAL WAX

Modelling Wax

Metrodent Modelling Wax (UK)

Metrowax No. 2: Metrodent's most popular modelling wax. Easy to carve. Suitable for a variety of situations. Blend of paraffin and micro-crystalline waxes. Ideal for high workflow prosthetic laboratories where its consistency aids smooth production. Colour: Pale 'Bluish' Pink. Sheet Size Approx 175mm x 87mm.

Metrowax Light Pink: No.2 formula by Lighter pink shade. Metrodent's most popular modelling wax formula. Easy to carve. Suitable for a variety of situations. Rapidly becoming a best seller our Light Pink modelling wax is based on our No.2 formula. A blend of paraffin and micro-crystalline waxes gives familiar ease of handling and consistent qualities aiding smooth work processing in the laboratory. This desirable colour option offers excellent soft tissue representation at try-in stage and is well received by both patients and clinicians. Colour: Light Pink. Sheet Size Approx 175mm x 87mm.

Metrowax No. 1 Tropical: Metrodent's highest melting point wax designed for warmer climates and where the try-in maybe in the mouth for extended periods. More brittle in lower temperatures. Especially good for carving. Colour: Very Pale Pink, Sheet Size Approx 175mm x 87mm.

Code	Description
WM-2.5	Metrodent Metrowax No.2 – Pale Pink - 2.5kg
WM-20	Metrodent Metrowax No.2 – Pale Pink - 20kg (2WAX20)
WM-LP2.5	Metrodent Metrowax LIGHT PINK – 2.5kg Box (LPWAX2.5)
WM-LP20	Metrodent Metrowax LIGHT PINK - 20kg Carton (LPWAX20) – NEW SHADE
WM-20-N1	Metrodent Metrowax No.1, Tropical 20kg – SPECIAL ORDER ITEM

Cavex Modelling Wax

The modelling wax of choice. The unique well balanced composition makes Cavex Set Up Wax easy to work with. Pink modelling wax for prosthetic dentistry (setting up teeth). Composition based on a perfect combination of paraffin, microwax and bee's wax. No distortion of the wax, due to small range (<5%) of melting points. No runniness or droplet formation. Sheet Size: 18.6 x 8.9 cm – Good natural light paler pink colour – Similar shade to Investo (Lordell) Natural Shade

Code	Description	
C-MWS	Cavex Set Up Modelling Wax, Standard, Pink, 1 x 500g	
C-MWS-10 Cavex Set Up Modelling Wax, Standard, Pink (5kg) 10 x 500g – Multibu		
C-MWS-20	Cavex Set Up Modelling Wax, Standard, Pink (10kg) 20 x 500g – Multibuy Price	

Investo (Lordell) Modelling Wax

General all-purpose wax ideal for set-ups, bite rims and try ins. Produced using the old-fashioned wax rolling method - the only way to produce the unique properties.

Medium hardness wax, Sheet Size 160mm x 80mm, Thickness 1.5mm.

Standard Shade (Translucent Pink): Darker Pink.

Natural Shade: Lighter Pink Shade

Code	Description	
WI-S-500	Investo Modelling Wax, Standard Shade (Translucent Pink), 500g (INW100) *Exact same as Lordell	
WI-N-500	Investo Modelling Wax, Natural Shade (Light Pink), 500g (INW150) *Exact same as Lordell – Similar shade to Cavex wax	

DENTAL WAX

Sticky Wax (Model Cement)

Kemdent UK - Sticky Wax also known as model cement. Melt the end of the stick with a gas flame and use as wax glue. For removal just reheat and the wax melts cleanly away without residue. Colour Natural, Consistency: Brittle. Stick Size 100mm x 10mm Dia.

Code	Description
WK-SW	Kemdent Sticky Wax, Natural, 500g
WA-SW	Ainsworth Sticky Wax, Yellow, 454g
WA-SW-55	Ainsworth Sticky Wax, Yellow, 55g

Palate Rugae Patterns

Palate Patterns gives denture life-like natural-looking tissue finish.

Code	Description
WRP-F	Finopat Palate Template - Thermoplastic - 6 (31742)
KS-WRP	Keystone Palate Patterns - Wax - 100 (1600010)

Stippled Casting Wax

Renfert Stippled Wax Fine – Proven wax for modelling partial denture bases in the maxilla. Sheet thickness 0.3-0.6 mm. Sheet Size 150×75 mm

Code	Description
R-CW-0.3	Renfert GEO Casting Wax - Fine Stippled - 0.3mm - Turquoise - 15 Sheets (6413030)
R-CW-0.5	Renfert GEO Casting Wax - Fine Stippled - 0.5mm - Turquoise - 15 Sheets (6413050)

Wax Wire For Casting Sprues – Roll Wax

Code	Description
R-GW-2.5	Renfert GEO Wax Wire - Dia 2.5mm - Medium Hard - Blue - 250g (678-3025)
R-GW-3.0	Renfert GEO Wax Wire - Dia 3.0mm - Medium Hard - Blue - 250g (678-3030)
R-GW-3.5	Renfert GEO Wax Wire - Dia 3.5mm - Medium Hard - Blue - 250g (678-3035)
R-GW-4.0	Renfert GEO Wax Wire Dia 4.0mm Medium Hard - Blue - 250g (678-3040)
R-GW-5.0	Renfert GEO Wax Wire Dia 5.0mm Medium Hard - Blue - 250g (678-3050)

DENTAL WAX

Periphery Wax

Lordell Periphery: Used to expand the periphery of the impression tray. Medium density (Soft/Hard). Stick Size: 160×6 mm

Code	Description
WL-PW	Lordell Periphery Wax - Blue - 72 Sticks

Bite & Boxing Wax

Bite & Boxing wax is a softer wax used for bite registration which offers excellent stability. Soft wax - Colour Red - Sheet Size 160mm x 80mm - Thickness 1.5mm

Code	Description
WI-BB	Investo Bite and Boxing Wax - Soft - 500g - Same as Lordell packaged product.
WI-BB-5	Investo Bite and Boxing Wax - Soft - 5kg BULK BUY (10 x 500g Boxes) — Multibuy Price
WI-BB-10	Investo Bite and Boxing Wax - Soft - 10kg (20 x 500g Boxes) — Multibuy Price

Bite Blocks / Bite Rims Wax

Ainsworth Eziset - Preformed bite rims for setting teeth into. Medium hardness - pink in colour, Stick Size $125 \times 11.5 \times 7.5$ mm, Colour Pink

 $\textbf{Metrodent Bite Blocks} \text{ - Ideal for detailed occlusal records. Stick Size } \textbf{112} \times \textbf{12} \times \textbf{11} \text{mm, 48 Blocks, } \text{Colour Pink}$

Code	Description
WA-BB	Ainsworth Eziset Bite Blocks - 48 sticks - 400g
WM-BB	Metrodent Bite Blocks – Original Pink - 48 sticks - 600g (WAXBB48)

CROWN AND BRIDGE - MODELLING WAX

Crown and Bridge Modelling Wax - Wax-Up Wax & Diagnostic

The GEO Classic line offers a selection of soft, medium and hard modelling and special waxes with very good carving, modelling and milling properties for the production of crown and bridge restorations.

Areas of application: Frameworks, Single crowns, inlays and onlays, Bridge restorations, Milling techniques, telescope and conical crown techniques, Full and press-ceramic, Monolithic & diagnostic wax-ups

The wax-up waxes (GEO Snow-white L opaque and GEO Snow-white L transparent) provide assistance in both functional and aesthetic planning for dental restorations.

Opaque - Provides excellent masking power, covers plaster and metal framework. **Transparent** – Burns without residue

Diagnostic and Aesthetical Wax Up Wax:

- Renfert GEO Natural Naturally tooth-coloured wax-up wax (Tooth Shade: Dentin A2).
- Renfert GEO Snow White White wax-ups are particularly well suited for demonstrating the final dental work to the patient.

GEO Classic **Avantgarde** - The inorganic, opaque, medium hardness GEO Classic Avantgarde modeling waxes with excellent modeling and carving characteristics are ideally suited for conventional crown and bridge techniques. They are especially suited for modeling with an electric wax knife.

SEE RENFERT CATALOGUE FOR ALL DETAILS - Temperature Ranges etc

Code	Description

CROWN AND BRIDGE - MODELLING WAX

Crown and Bridge - Specialty Waxes

Renfert GEO Undercut Blockout Wax 6500000 - This wax is suitable for blocking undercuts, cavities or errors on plaster models for both model casting and crown and bridge techniques. Ideal for duplication with duplicating gels or agar-agar. Very high adhesive qualities even on a damp model.

Renfert GEO Cervical Wax 4861000 - A hard, stable and tension-free cervical wax for precise modeling of the cervical edge. The GEO Classic cervical wax is an organic wax which burns-out residue-free. It is ideally suited for use with conventional crown and bridge techniques as well as for full and press-ceramic techniques. *Non-rebounding wax for forming crown margin.*

Renfert GEO Cervical and Undercut Wax 4891000 - A soft, slightly elastic and tension-free cervical and undercut wax for precise modeling of the cervical margin. *Non-rebounding wax for forming crown margin.*

Renfert GEO Classic Milling Wax - Hard, opaque, milling wax, designed for machining using milling techniques. Low chip formation due to ideal wax hardness. Ideal for quick and efficient modeling of telescope, conical crowns and attachment work and then subsequent wax milling. No adhesion or smearing of wax chips on carbide cutters or wax burs and carvers when processing at the recommended rpm between 2,500 and 5,000 1/min

Code	Description
R-GBO	Renfert GEO Blockout Wax, Pink, Opaque, 75g 6500000
R-GC	Renfert GEO Classic Cervical Wax, Hard, Bordeaux-Transparent, 75g 4861000
R-GCS	Renfert GEO Classic Cervical and Undercut wax, Soft, Red-Transparent, 75g 4891000
R-GMW	Renfert GEO Classic Milling Wax, Blue, Opaque - 75g - 4851000

Crown and Bridge – GEO Dipping Wax

Dipping waxes - Ready-to-use wax dipping pellets for the production of wax copings using wax dipping equipment.

Areas of application

- Precise copings for all crown and bridge techniques.
- Organic, burns residue-free, suitable for full and press ceramic techniques.

GEO Dip

Soft, elastic dipping wax with excellent shaping characteristics.

Advantages

- Highly precise wax copings due to low shrinkage.
- No deformation on removal due to elastic and tear resistant wax copings.

Code	Description
R-GD-Y	Renfert GEO Dip Yellow-Transparent - Soft, approx. 200 g - 4823000
R-GD-O	Renfert GEO Dip Orange-Transparent - Soft, approx. 200 g - 4823200
R-GD-G	Renfert GEO Dip Green-Transparent - Soft, approx. 200g - 4823300

CROWN AND BRIDGE - DIESPACER

Diespacer Varnish & Thinner - Renfert C&B

Lacquering and Separating Materials

Renfert Die Master - The die:master system provides you with perfect die preparation as a working basis for conventional and all-ceramic restorations. Especially suited for conventional restorations. Extremely resistant to steam and scratches and maximum bond between varnish and hardener. With the Renfert die:master system, Renfert offers air-drying die varnish in three layer thicknesses (13, 15 and 20 µm) and five opaque colors. Fast drying. For the creation of a highly interlinked, glass-like varnish layer. High steam and scratch resistance. Uniform and precise application due to thixotropic flow properties.

Code	Description
R-DM-S	Renfert Die Master Varnish, Silver, 13um, 15ml (1956-0400) DG
R-DM-G	Renfert Die Master Varnish, Gold, 13um, 15ml (1956-0500) DG
R-DM-R	Renfert Die Master Varnish, Red, 15um, 15ml (1956-0200) DG
R-DM-B	Renfert Die Master Varnish, Blue, 20um , 15ml (1956-0300) DG
R-DM-GR	Renfert Die Master Varnish, Grey, 20um, 15ml (1956-0100) DG
R-DM-T	Renfert Die Master Thinner, 30ml (1956-0700) DG

Die Master Ivory - Especially suited for full ceramic restorations. Extremely resistant tooth colored die varnish (Vita $^{\circ}$ Shade A2/B2). Layer thickness: $10\mu m$

Die Master Aqua - Especially suitable for press ceramic. Resistant tooth colored die varnish (Vita® Shade A1/B1), easily removed with water. Layer thickness: 10μm

Code	Description	
R-DM-I	Renfert Die Master Varnish, Ivory, 10um , 15ml (19570200) DG	
R-DM-A	Renfert Die Master Varnish, Aqua, 10um , 15ml (19570500) DG	
R-DM-AT	Renfert Die Master AQUA Thinner, 30ml (19570550) – Only used	
	for Aqua 19570500 - DG	

Die Hardner and Sealer / Primer - Renfert C&B

Renfert Die Master DUO - Hardener and sealant for plaster dies and areas of the plaster model (0 μ m). In-depth hardness and high edge-strength due to powerfully cross-linked die stone structure. Perfect die preparation as a working basis for conventional and all-ceramic restorations.

Code	Description
R-DM-D	Renfert Die Master Duo Hardener, 0um , 15ml (19560600) DG

Separator - Renfert C&B

Lacquering and Separating Materials

Renfert PicoSep - For separating plaster from wax and ceramic. Free of solvents. Does not affect the spacer and does not evaporate. 2 in 1: Micro film isolates plaster against wax and porcelain. Renfert Iso-Stift - A practical, double-sided isolating stick for isolating plaster against porcelain and wax. Soft and hard tip for individual applications.

Code	Description
R-PS	Renfert PicoSep Separating Agent, 30ml (15520030)
R-IS	Renfert Iso-Stift - 2 Ended Isolating Stick (Wax/Plaster - Porcelain/Plaster) 17093000 - 1 x 4.5ml

CROWN AND BRIDGE - BRUSHES

Renfert C&B Dental Ceramic Brushes

*See Renfert catalogue or website for full range and sizes.

Kolinsky - Ceramic Brushes

Natural bristle brush made from Kolinsky red sable bristles – quality and aesthetics combined. Fine, flexible brush tip. Optimum liquid reservoir. 6 different sizes for individual uses.

Code	Description
R-CB-KSET	Renfert KOLINSKY Brushes (6pcs Set - 1, 2, 4, 6, 8, 1/0) - Building up, Stain/Glaze - 17131000 - 2 pcs
R-CB-KN1	Renfert KOLINSKY Brush Size 1 - Stain/Glaze – 17131001 - 2 pcs
R-CB-KN2	Renfert KOLINSKY Brush Size 2 - Building up - 17131002 - 2 pcs
R-CB-KN4	Renfert KOLINSKY Brush Size 4 - Building up - 17131004 - 2 pcs
R-CB-KN6	Renfert KOLINSKY Brush Size 6 - Building up - 17131006 - 2 pcs
R-CB-KN8	Renfert KOLINSKY Brush Size 8 - Building up - 17131008 - 2 pcs
R-CB-KN0	Renfert KOLINSKY Brush Size 0/1 - Stain/Glaze - 17131110 - 2 pcs

Takanishi - Synthetic Bristle Brush - Ceramic Brushes

Very high quality synthetic bristle brush which has been well proven for many years for the optimal porcelain buildup. The brush tip remains stable. Highly flexible brush bristles. Ideal for reducing porcelain.

Code	Description
R-CB-TN00	Renfert TAKANISHI Brush Size 00/000 - 17010000 - 4 pcs
R-CB-TSET	Renfert TAKANISHI Brushes (6pcs Set - 1/0, 2, 4, 6, 8, Opakerpinsel) - 17140000 - 4 pcs
R-CB-TN1	Renfert TAKANISHI Brush Size 1 - 17140001 - 2 pcs
R-CB-TN2	Renfert TAKANISHI Brush Size 2 - 17140002 - 2 pcs
R-CB-TN3	Renfert TAKANISHI Brushes - Size 3 - 17140003 - 2 pcs
R-CB-TN4	Renfert TAKANISHI Brushes - Size 4 - 17140004 - 2 pcs
R-CB-TN5	Renfert TAKANISHI Brushes - Size 5 - 17140005 - 2 pcs
R-CB-TN6	Renfert TAKANISHI Brushes - Size 6 - 17140006 - 2 pcs
R-CB-TN8	Renfert TAKANISHI Brushes - Size 8 - 17140008 - 2 pcs
R-CB-TN10	Renfert TAKANISHI Brush - Size 10 – 171400010
R-CB-TN12	Renfert TAKANISHI Brush - Size 12 – 17140012
R-CB-TN14	Renfert TAKANISHI Brush - Size 14 – 17140014
R-CB-TN10	Renfert TAKANISHI Brushes - Size 1/0 - 17140110 - 2 pcs
R-CB-TN20	Renfert TAKANISHI Brushes - Size 2/0 - 17140120 - 2 pcs
R-CB-TO	Renfert TAKANISHI Opaquer Brushes- 17140200 - 2 pcs

Layart (Lay:Art) Style - Natural Bristle Brush Ceramic Brushes

lay:art style natural hair brushes provide premium quality for the highest demands. An innovative manufacturing technique achieves maximum values in terms of tension, dimensional stability and durability of the brush tip.

Code	Description
R-LA-CB	Renfert lay:art style colour brush - 2 pieces - Stain/Glaze 17250000
R-LA-OB	Renfert lay:art style opaque brush - 2 pieces - Opaque application 17250001
R-LA-B2	Renfert lay:art style brush Size 2 - 2 pieces - Building Up – 17250002
R-LA-B4S	Renfert lay:art style brush Size 4 slim - 17250004
R-LA-B6S	Renfert lay:art style brush Size 6 slim - 17250006
R-LA-B8S	Renfert lay:art style brush Size 8 slim - 17250008
R-LA-B4B	Renfert lay:art style brush Size 4 bold - 17250014
R-LA-B6B	Renfert lay:art style brush Size 6 bold - 17250016
R-LA-B8B	Renfert lay:art style brush Size 8 bold - 17250018
R-LA-B4C	Renfert lay:art style brush Size 4 cone - 17250040
R-LA-SSET	Renfert lay:art style Set (with 1 piece each of brush Size 2 / Opaque / Color) 17251000 – 3pcs

CROWN AND BRIDGE – CERAMIC TOOLS

Renfert ERGO Instruments

ERGO Acryl – Ceramic Instrument for veneering composite Double-sided modelling instruments ideal for acrylic facings.

Double-sided modelling instruments ideal for acrylic facings.

Advantages

- Three individual flexible blades, 0.2 mm thick.
- Flexible blades are secured to the instrument handle by a threaded connection and can be easily exchanged, as required.
- Ideal for applying and modelling modern facing acrylics.

ERGO Wax - Wax modeling instrument

ERGO wax instruments are characterised by the wide variety of applications for which they can be employed and by their individual adaptability. The handle design is different for each instrument, thus making them unique.

Advantages

- Instruments can be ground according to individual needs.
- Probes, blades and scrapers made from handground stainless steel.
- Fine, anodised handles, comfortable to hold, heat-resistant and insulated.

Code	Description
R-EA1	Renfert Ergo Acryl Instrument, No.1, 1 piece 10521100
R-EA2	Renfert Ergo Acryl Instrument, No.2, 1 piece 10521200

Ceramic Mixing Trays

Code	Description
R-MT-LAC	Renfert LayArt COLOUR Mixing Tray 10470000
K-IVII-LAC	Glazed ceramic tray for preparing and storing stains.
D MT LACYL	Renfert LayArt CRYSTAL AQUA XL Mixing Tray 10431000
R-MT-LACXL	Partially self-moistening glass mixing tray with two moistening strips.
R-MT-SM	Renfert STAIN MIX Mixing Tray - Black Cover - 10650100
K-IVI I -SIVI	Stain mixing trays for porcelain and acrylic stains.
	OTHER RENFERT MIXING TRAYS – Special Order – See Catalogue

3D PRINTING RESINS

Freeprint - Detax

Premium materials for open 3D printers

Light-curing resin for LED printer with a wavelength of 405nm or light spectrum of 378-388 nm

- splint biocompatible, clear splints & templates Medical Device Class 2a - Colour: clear transparent
- model dental models, fast build speed Colours: ivory, grey, sand, caramel
- cast patterns, burns residue-free Colour: red
- tray fabrication of individual impression and functional trays and base resin plates. Medical Device Class 1 – Colour: Green
- temp for the generative fabrication of temporary crowns & bridges. Colour: A1, A2, A3
- model T for the generative fabrication of dental models for the thermoforming technique -Colour: light blue
- ortho UV for the generative fabrication of base parts for orthodontic apparatuses, drilling and X-ray templates, occlusal and fixation splints - Freeprint® ortho UV: Validated pro-cesses for sterilization in autoclaves - Medical Device Class 2a - Colour: clear transparent

UV DLP printers are considered to be more advanced because they can print crystal clear and you can print different shades of composites with Freeprint.

The newer printers are all with UV projectors: Asiga, Rapidshape, W2P, Miicraft etc.

The residues of the 3D resin adhering to the surface are removed in an ultrasonic isopropanol bath for 2×3 minutes.

Final polymerization is performed with the Otoflash G171 curing unit by NK Optik (Fig. 2) under protective gas (nitrogen) . 2×2000 flashes take only approx. 6 minutes to complete postcuring.

UV Type is for UV light (invisible) 3D Printer models **Standard 405nm Non UV Type** is for LED 3D Printers length wave of 405 nm

SEPARATING SOLUTION & SURFACTANT SPRAYS

Separating Solutions – Plaster to Acrylic

Separating solution is painted on to form a separating barrier between the plaster and acrylic in the flask. Sodium Alginate based separating solution works by a chemical reaction to the stone. Excess solution should be washed off before it dries.

Applications:

- Gypsum to acrylic
- Gypsum to composite
- On all gypsum materials
- For heat curing and self (cold) curing acrylics

Durodent Model Seal

EH-HK-5	Ernst Hinrichs Hinrisep K (109222) 5 Ltr NEW

Wax Isolation - Plaster to Wax

Silicone based separating agent for optimal isolation of plaster from wax. Advantages Excellent isolation of plaster against wax, Exact fitting accuracy due to the minimal thickness of the isolation layer, Smooth and smear-free surfaces due to the low residues of isolating agent.

Code	Code Description	
R-PS	Renfert PicoSep Separating Agent, 30ml (15520030)	

*If the solution has gone watery (no longer slimy or slightly thick) then it will no longer work as the natural alginate material has broken down due to

Acrylic, Plaster & 3D Printed Models from Methacrylate Acrylics

Insulation of acrylics and acrylic models. Also very popular for and suitable for the insulation of plaster and 3D resin printed models.

Code	Description
HP-PF	Kulzer Palaferm Insulation 80ml 64707627

Isolating / Pens - Plaster / Wax or Plaster / Porcelain (Ceramic)

Signum Insulating Pens A two component isolation to separate gypsum/plaster or epoxy resin from the veneering composite material and ceramic. Pen I - Closes the micro pores on the plaster surface. / Pen II - Forms an extremely thin separating film that allows a high fitting accuracy.

Renfert Iso-Stift - A practical, double-sided isolating stick for isolating plaster against porcelain and wax. Soft and hard tip for individual applications.

Code	Description
HSA-IPK	Kulzer Signum Insulating Pen I & II Kit, 64712597
HSA-IP1	Kulzer Signum Insulating Pen I, 12ml, 64712595
HSA-IP2	Kulzer Signum Insulating Pen II, 12ml, 64712596

SURFACTANT SPRAYS & DUBBLEISER

Debubblizer and Surfactant Sprays

Ernst Hinrich Hinrisid

- ERNST HINRICH surfactant-based surface release agent is a universal wetting agent for the bubblefree production of plaster / gypsum models or investment in silicone duplicates.
- Tenside-based surface relaxer
- Also suitable for polyether's.
- Water Based

	Code	Description
	EH-HS-250	Ernst Hinrich Hinrisid Debubblizer - 250ml Spray Bottle - 109410
	EH-HS-1000	Ernst Hinrich Hinrisid Debubblizer Refill Bottle - 1000ml - 109411

Ernst Hinrich Scan Spray PLUS - CAD CAM

High grade Extra-fine atomiser for ultra fine spray film, ensures finest edge presentation, homogeneous spray condition with very smooth surfaces, easy to clean with water steam, suitable for all CAD-CAM systems, for the extraoral application (gypsum model)

Code	Description
EH-SP	Ernst Hinrich HinriScan Spray PLUS - 200ml – 720023 DG

SPECIAL TRAY MATERIAL

Light Curing - Special Tray Material

Palatray XL - Kulzer

Light-curing. Ready to use, pre-formed upper trays.

- Optimised, anatomical shape of plates, extra large
- High tearing resistance and stableness
- High breaking resistance
- Pleasant peach flavour
- Extended processing time
- Colour: Pink
- Thickness: 2mm

Code	Description
HP-PTXL	Kulzer Palatray XL (64715806) 1 x Box 50pc

Hinritray - Ernst Hinrich - Germany

Light-curing tray material for fabricating functional trays, custom trays, bite-blocks, registration bite plates and for other uses in the laboratory.

Code	Description
EH-HT-P	Ernst Hinrichs Hinritray, Pink, 50 (801000)

RELINE MATERIAL & TISSUE CONDITIONERS

Denture Soft Liner Materials – Long Term

Molloplast B (Heat Cure) Permanent Soft Liner – Detax

Permanent soft heatcured relining material for processing in dental laboratories. One-component silicone, heat curing, microwave-polymerising, wide indications. Curing Time: Microwave 20 mins or Standard Cure 2 hours approx.

Code	Description
DMB-45	Detax Molloplast B Standard Pack, 45g (03000)
DMB-170	Detax Molloplast B Laboratory Pack, 170g (03001)

→ For Soft Liner Polishers (Refer page 46) and Cutting / Trimming burs (Page 55)

Detax Soft Liner Accessories – Adhesive & Sealing Products

Primo Adhesive – Used when relining existing acrylic denture. Increases and ensures the bonding of Molloplast B to the denture base. Especially suitable in case of repeated repairs, extensions and relinings of acrylics.

Lustrol Varnish - Silicone based gloss varnish for sealing and smoothing of permanent soft Mollosil*- and Molloplast B silicone based relinings. Mixing ratio 1:1

Code	Description
DPA	Detax Primo Adhesive – 1 x 15ml (03004) DG
DLV	Detax Lustrol Varnish Pack - 1 x Base 6ml / 1 x Catalyst 6ml (03008) DG

MOLLOPLAST-B

Dura Rely-A-Soft – Chairside or Lab Denture Soft Liner

Dura Rely-A-soft - Soft chairside reline acrylic resin. Long-term resilient soft cushion denture liner for Chairside or Laboratory Use. Available in Pink. Remains resilient for up to 12-18 months due to plasticization. High colour stability – Non-methyl methacrylate

Code	Description
RD-RAS	Reliance Dura Rely-A-Soft – Pink - 100g/118ml (1701) - Non Haz

Selfcure Chairside Permanent Soft Lining

Mollosil Plus - Detax

Long-term soft relining material for chair-side use, A-silicone based, cold curing, biocompatible. Material is directly applied onto the denture base. Cures fully in the mouth in 5 minutes, without heating. Suitable for indirect technique. Apply material directly to the denture after investing, flask is closed and pressed together. The material is then bench-cured. Colour: Gingiva

Code	Description
DM-K	Detax Mollosil Plus Kit Automix2 (02353) Includes: 1 x 50ml Cartridge Mollosil* plus, 7 x pink mixing cannulas 6mm, 5ml mollosil* plus primer, 2 x 7ml mollosil* plus polish, 1 x grinding sleeve holder pointed, 1 x grinding sleeve pointed
DM-RC	Detax Mollosil Plus Refill Cartridge, 1 x 50ml (02354)
DM-PR	Detax Mollosil Plus Primer, 5ml (02440)

Tissue Conditioner – Short Term Temporary Relief

Softest Temporary Reline - Short term/temporary cushion relief for up to 3 months. Treats and tones tender gingival and ridge areas with pleasant tasting powder/liquid combination.

Dura Conditioner – Fast setting time of approximately 10-15 minutes in mouth. Pleasant Peppermint flavour for the patient. Easy trimming material.

	Code	Description
	RD-DC	Reliance Dura Conditioner KIT, Pink, 112g / 120ml (1801-P)
	RD-DC-L	Reliance Dura Conditioner LIQUID ONLY - Pink - 120ml (1803)
	RD-DC-P	Reliance Dura Conditioner POWDER ONLY - Pink - 112g (1802-P)

Blue Eco Lab Putty - Detax

86 Shore Hardness A 1:1 Mix

Precise detail reproduction, retaining its shape and volume, smooth and supple consistency, multi-purpose use. *Excellent for processing and insulating teeth*.

- Equal Part Mix 1:1.
- Final Hardness: 86 Shore A.
- Heat Resistant up to 200 °C.
- Colour: Light Blue Base, White Catalyst.
- Mixing Time: Approx. 30 secs
- Working Time (23°C): Approx. 1 min 30 sec.
- Setting Time (23°C): Approx 4 mins 30 sec.

Code	Description	
DBE-1.6	Detax Blue ECO Putty, 1.6kg (2 x 800g) 02038	
DBE-10	Detax Blue ECO Putty, 10kg (2 x 5kg) 02467	

Putty Tip:

Silicone putties react to Latex and will not set if contaminated.

Make sure hands are washed or use Nitrile gloves only.

Pala Putty - Kulzer

90 Shore A Hardness A 1:1 Mix

High-precision laboratory A-silicone with a fast setting time.

- Easy to mix in 1:1 ratio
- High reproduction of details (20 μm)
- Dimensional stability over time (<0.05 % after 24 h)
- Resistant To Heat (eg in a pressure curing unit approx 110°C)
- Great tear resistance
- Mixing Time: 30-45 sec.
- Working Time: 1:30 min
- Setting Time: 4:00 6:00min (@ 23°C)
- Colour: Light Blue

Code	Description
HP-LP-3	Kulzer Pala Lab Putty 90, 3kg (2 x 1.5kg) 66057432
HP-LP-10	Kulzer Pala Lab Putty 90, 10kg (2 x 5kg) 66057433

LAB PUTTY

Zetalabor Lab Putty - Zhermack

85 Shore Hardness A

C-silicone laboratory putty for duplication of denture moulds, control matrix for the design of metal structures, impressions for copy denture technique, matrix for use in making temporary crown/bridges, matrix for the reproduction of gingival tissue (eg Zhermack gingifast), insulation of teeth/gypsum in flask. High initial flowability.

Final Hardness: 85 Shore A.
Heat Resistant: Up to 140°C.
Detail Reproduction: 20 µm
Mixing Time: 30 secs

Total Working Time (23°C): 2 minutes

Setting Time (23°C): 6 minutes

Code	Description
ZZP-2.6	Zhermack Zetalabor Lab Putty, 2.6kg (C400790) inc 1 Activator Free

ZPA	Zhermack Indurent Gel Activator, 60ml (C100700)*

^{*} Indurant Gel Activator (ZPA) for Zetalabor Putty, Thixoflex M, Oranwash L, Oranwash VL, Zetaplus Soft and Titanium Putty. Recommended quantity is 2×60 ml per 5kg Putty.

Platinum 95 Lab Putty - Zhermack

95 Shore Hardness A

High precision laboratory A-Silicone putty material. Mask for constructing provisional prosthesis. Addition or replacement of elements on total prosthesis or metal frame works. Blocking in the repair of prosthesis. Occlusal regulation key for positioning in an articulator. Duplication of total prosthesis and gypsum models without using insulators.

Final hardness: 95 Shore AHeat Resistant: Up to 200°C.

Colour: Light Blue

Detail Reproduction: 20 μm

Mixing Time: 30 secs

Total Working Time (23°C): 2 minutes

Setting Time (23°C): 6 minutes

Code	Description
ZPP-2	Zhermack Platinum95 Putty, 2kg (2 x 1kg) C400700

DUPLICATING & INSULATING MATERIAL

Duplicating Gel

Duplicating Gel – For Gypsum / Plaster

Hinrigel Green - Reversible & Microwaveable All purpose for acrylics, gypsum, phosphate bonded investment. The fine-flowing duplicating gel is suitable for investments and dental gypsum. Hinrigel has a high elasticity and volume stability.

- Melting Temp: 93 ºC.
- Pouring Temp: 50ºC.
- Microwave guide 800W for approximately 2 minutes (visual control)
- Colour: Green

Cod	e	Description
EH-	HG	Hinrichs Hinrigel Green, 6kg (107953)

Duplicating Silicone

Heraform – Addition curing, crosslinked, low shrinkage, highly elastic and filler free silicone is used to reproduce the master stone model in the removable partial denture technique. The components A+B are processed in a 1:1 ratio. Mixing Time Under Vacuum: 45 seconds - Curing Time: Approx 20 Mins -Final Hardness: 20 Shore A - Colour: White and Orange

Code	Description
HH-HF-2	Kulzer Heraform Silicone Type A+B, 2 x 1kg, 6450 0811
HH-HF-10	Kulzer Heraform Silicone Type A+B, 2 x 5kg, 6460 0982

Hinrisil Hydro - Hinrisil hydro is a duplicating silicone, specially formulated to have hydrophilic properties. Surfaces no longer require wetting. Suitable for automatic dispensers. Working Time: 4-5 Mins, Curing Time: Approx 30 Mins, Final Hardness after 60 mins: 22-24 Shore A Colour: Green

Code	Description
EH-HH-2	Ernst Hinrichs Hinrisil Hydro Duplicating Silicone 1:1 - Shore 22-24 - Green, 2 x 1kg (2kg), 107960
EH-HH-12	Ernst Hinrichs Hinrisil Hydro Duplicating Silicone 1:1 - Shore 22-24 - Green, 2 x 6kg (12kg), 107963

Flexistone Plus - Detax

Insulating and modelling material, A-silicone based, light bodied, excellent stability, very high final hardness (75 Shore A). Optimum flow properties during spatulation.

For insulating dentures during investing. Protection of acrylics and acrylic teeth against plaster.

Especially indicated for use with injection moulding techniques.

- Equal Part Mix 1:1.
- Final Hardness: 75 Shore A.
- Heat Resistant up to 200 °C.
- Colour: Base Blue, Catalyst White 1:1
- Mixing Time: Approx. 45 secs
- Working Time (23°C): Approx. 4 min
- Setting Time (23°C): Approx 15 mins

Code	Description
DFS-320	Detax Flexistone Plus Standard Pack, 2 x 160ml (02383)
DFS-2000	Detax Flexistone Plus Eco Pack, 2 x 1000ml (02329)

Zhermack Colorbite D Bite Registration – Used for lab technique insulating around teeth when processing / injecting

ARTICULATING PAPER & ACCESSORIES

Bausch Articulating Paper - 200 Micron

Bausch 200 μ Articulating Paper with progressive colour transfer, that highlights overall pressure distribution by means of different colour shades:

THE LIGHTER THE BITE, THE LIGHTER THE MARK THE HARDER THE BITE, THE DARKER THE MARK

Code	Description

POLISHING OPTIONS - RUBBER

Acrylic Rubber Polishers

Kerr Lab-Min Identoflex Polishers - Snap On

The Lab-Min Polishers are special unmounted polishers for acrylics and other synthetic resins, gold and non-precious metals and hard or soft reline materials. Two grit sizes, brown (coarse) and grey (fine), enable a rapid performance and generate no heat. Maximum speed: 15,000 rpm. Made In Switzerland

Code	Description
KLM-B	Kerr Lab-Min Brown, Medium , 12 + Mdrl – ID 1510/12
KLM-G	Kerr Lab-Min Grey, Fine, 12 + Mdrl – ID 1610/12

Kerr

Kerr Super Acrylic Polishers Identoflex - Mounted

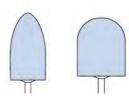

A specially developed polisher for acrylics. The dark blue polisher is used during the initial polishing phase. It will smooth away coarse and rough areas of the prosthesis without damaging teeth. The fine light blue polisher prepares the prosthesis for final lathe polishing. Excellent durability. Made In Switzerland

Code	Description
KI-MDB-F	Kerr S/Acryl Polisher , Mounted, Coarse, Dark Blue, Flame, 6 – ID2312/6
KI-MLB-F	Kerr S/Acryl Polisher , Mounted, Fine, Light Blue, Flame, 6 – ID2412/6

Edenta Exa Technik Mounted Acrylic Polisher - Mounted

Fine (Yellow)grit silicone polisher for optimally smoothing and condensing material surfaces.

Produces a high-shine polish without polishing paste. Made In Switzerland

Medium Grit (Grey) - Silicone polisher for smoothing and condensing material surfaces. Produces a slight lustre.

Code	Description
ERP-0656	Edenta Exa Technik Acrylic Polisher, Fine, Yellow Mounted, Point, 6 (0656HP)
ERP-0662	Edenta Exa Technik Acrylic Polisher, Medium, Grey Mounted, Rounded, 6 (0662HP)

POLISHING OPTIONS – SOFT LINER / ACRYLIC

Scotchbrite Polishers - Mounted

Scotchbrite wheels are excellent for polishing mouthguard material and to polish other surfaces without ruining delicate anatomical surfaces on dental appliances.

Gold/Brown - Rough wheel 220 Grit has the strongest abrasion, excellent for finishing soft liner acrylics.

Black - Medium strength 280 Grit

Red/Purple - Fine 360 Grit grained leaves a silk matte surface.

By using low speeds – around 5,000 rpm – and light pressure the acrylic should not overheat.

Code	Description
SBP-SR	Keystone Miniature Scotch Brite Wheels, Soft (Fine) - 360 Grit - Red - 12pc - 1670091
SBP- MB	Keystone Miniature Scotch Brite Wheels, Medium - 280 Grit - Black - 12pc - 1670092
SBP- HG	Keystone Miniature Scotch Brite Wheels, Hard (Rough), Gold - 220 Grit - 12pc 1670016

Softcrack Wheels

Soft, elastic, multi-layer grinding discs with optimal grit size for use with soft and elastic resins and grinding and contouring of re-linings, flexible splints, mouth guards etc. High material reduction, no smearing, Low heat build-up, Smooth surfaces without streak formation. Size: 22mm Dia / 3mm Wide, RPM 8,000 – 12,000

Code	Description
E-SC	Edenta Softcrack Finishing Wheels, 10 + 1 Mandrel 4029HP (2100UM)

Detax Soft Liner Polishers and Grinding

Sleeves

Detax Grinding Sleeves - For smoothing and removing of uneven spots and for final finishing of permanent soft relining materials and all kinds of silicone materials. Easily trims the functional peripheries. Large: Ø 7 mm, grain 150, recom. approx. 20.000 rpm

Detax Pre-Polishers - Final finishing with Molloplast[®] pre-polishers (smoothing and removal of uneven spots).

Code	Description
DM-GS	Detax Molloplast Grinding Sleeves – Large - Pointed, 10 (02615)
DM-GSH	Detax Molloplast Grinding Sleeve Holder Mandrel Pointed, 1 (02616)

TRIMMING & ABRASIVE

Knockdown Lathe Wheels

White Wheel - The White (Aluminium Oxide) acrylic knock-down wheels are developed for trimming base plates, acrylic, and stone models. Facilitates rapid shaping with minimum pressure. The wheels generate little heat and will not clog. 36-46 grit. Courser than Black.

Black Wheel - The Black grinding wheel is excellent for trimming denture base plate materials, stone models and acrylics. The top-grade wheel delivers rapid cutting and will not clog at low speeds. The wheel has a 1/4" lead reinforced centre hole. 40-60 grit. Medium Coarse - Finer than White.

Green Wheel - The Busch Green Silicone Carbide abrasives grinding wheel are especially suited for grinding metal alloys, porcelain teeth and acrylics. Ceramic bonded. Ø of centre hole 6,5 mm Thickness 6,5 mm - Grit Size: Medium - Bonding Hardness: Medium

Rubber Wheel - The Rubber acrylic and baseplate wheel is a coarse grit, rubber bonded wheel. The wheel is excellent for grinding acrylic at normal lathe speed and for base plates at low speed. Coarse Grit.

Code	Description
LKW-W	White Knock-Down Wheel, 36-46 Grit / Coarse, 75 Dia x 10mm W
LKW-B	Black Grinding Wheel, 40-60 Grit / Med/Coarse, 75 Dia x 7mm W

TRIMMING & ABRASIVES

Cutting / Separating / Grinding Discs

Joe Dandy Disc - The Joe Dandy Type Discs are made of pure rubber-bonded silicon carbide abrasive in a special binder. They are used for fast, cool cutting and finishing on porcelain, acrylic, gold, alloys and other materials. Flat Shape, Double.

Renfert Separating Disc - For separating sprues on chrome cobalt alloys.

Renfert Dynex Standard - Flexible and robust, doubly glass fiber reinforced separating and grinding discs for metal alloys. Suitable for cutting and grinding thick sprues (< 5 mm) and small restoration areas made of precious and non-precious metal alloys.

Renfert Dynex Brillant Discs (Ceramics) - Flexible diamond grinding and separating discs with glass fiber reinforcement, created for cutting, separating and trimming porcelain, zirconium oxide and lithium disilicate. Thin and flexible for precise interdental separation and areal processing.

560820 - Extremely stable and high removal capacity, especially suited for processing and grinding lithium disilicate.

Edenta Exa Cerapol – Polisher For Ceramics

2- step finishing and polishing system suitable for all partial porcelain and full-crown restorations. Polishers for finishing and polishing porcelain surfaces. A second glaze firing is not necessary following adjustment.

Step 1 = grey - white: abrasive, eliminates scratches and smoothes the surface.

Code	Description
E-0310UM-100	Edenta Exa Cerapol 0310 UM – Tapered Edge Wheel - 22mm x 3mm – White – Pack 100 (0310UM-100)
E-0301UM-100	Edenta Exa Cerapol 0301 UM – Square Edge Wheel - 22mm x 3mm – White – Pack 100 (0310UM-100)

METAL POLISHERS – CrCo & NP ALLOYS

Chrome CrCo and Alloy Polishers

Superior Rubber Polishers – Blue Gloss – For Chrome and Gold Alloys

Made of pure fine silicon carbide abrasives in synthetic rubber. This combination makes for excellent finishes on chrome with long wear. Lustrous finish.

220 Grit Fine - Medium

Code	Description
SRP-W	Superior Rubber Polishers, Wheels, Blue, 220 Grit, 22.2 x 3.2mm, 100 (1900810)
SRP-P	Superior Rubber Polishers, Points/Cylinder, Blue, 220 Grit, 22.2 x 6.35mm, 100 (1640070)

Chromopol

Abrasive polisher for CrCo alloys with a long service life and maximum polishing capacity for optimally smoothing surfaces. Quick reduction of material when prepolishing bridges, crowns and CrCo alloy denture bases.

Available in 3 grit sizes, fine, medium and coarse.

Instructions for use: Apply only light pressure when polishing. Adhere to the recommended rpm. Max RPM 20,000

0.1.	Book to the

E-0225UM	Edenta Chromopol Cylinder, Brown, Course, 21 x 7mm, 100 (0225UM)

Steelprofi

Flexible polisher for CrCo alloys with 2 grades of abrasive for optimally smoothing the surfaces of bridges, crowns and CrCo alloy denture bases.

Step 1 = Black: Prepolishing, removes scratches and smoothes the surface. Max RPM 20,000

Step 2 = Green: Fine polishing produces a light sheen and prepares the surface for polishing with a polishing motor. Max RPM 10,000

Code	Description
E-1301UM	Edenta Steelprofi Wheel, Black Prepolish, 22 x 3mm, 100 (1301UM)
E-1323UM	Edenta Steelprofi Cylinder, Black Prepolish, 22 x 6mm, 100 (1323UM)

E-1423UM	Edenta Steelprofi Cylinder, Green, Fine, 22 x 6mm, 100 (1423UM)

Dedeco 'Classic' Rubber Metal Polishers

Black – Hard - Pin-point finishing and polishing of all metals.

Brown - Extra long-lasting – for fast pin-point finishing and polishing of non-precious and semi-precious metals. Uniquely capable of finishing or polishing depending upon the pressure used.

Green - Industry favourite -- for fast pin-point scratch removal and polishing of all metals.

Code	Description
DM-B4862	Dedeco Midget HP – Rubber Polishers - Brown Point (12), 4862
DM-BL4362	Dedeco Midget HP – Rubber Polishers - Black Point (12), 4362
DM-G4562	Dedeco Midget HP – Rubber Polishers - Green Point (12), 4562

METAL POLISHERS – PRECISIOUS ALLOYS

Precious / Semi Precious Alloy Polishers

Alphaflex HP - Edenta

Two step finishing and polishing system suitable for gold, composite, semi-precious alloys. Polishers impregnated with high-grade polishing agents for rapid finishing and high gloss polishing.

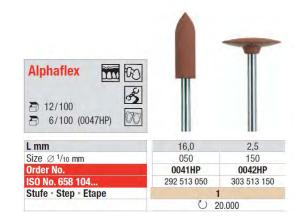

Step 1 = Brown: Pre-polishing

Instructions for use:

- Apply only light pressure when polishing
- Adhere to the recommended rpm
- Polishing paste is not required

Code	Description
E-0041HP	Edenta Alphaflex Polisher – Point – Brown – Fine - 16 x 5mm - 12pc (0041HP-12)
E-0042HP	Edenta Alphaflex Polisher – Disc Fine Edge – Brown – Fine – 15 x 2.5mm - 12pc (0042HP-12)

LATHE CHUCKS

Lathe Chucks - To suit standard dental lathe machine

Dental lathe chucks are for placement on standard generic dental lathe motor tapering shafts with approximate diameter of 9.52mm (3/8 inch) found on most standard dental lathes.

Tips:

- 1. Suits Generic dental lathe motor tapering shafts Approximate diameter of 9.52mm (3/8 inch)
- 2. Does Not Fit KAVO brand lathes Kavo can only be ordered from Henry Schien Halas
- 3. Please check the diameter of the lathe shaft before ordering so that the correct chuck is supplied. If the lathe shaft is a larger diameter than 9.52mm then the lathe is Industrial specifications. We DO NOT stock accessories for industrial size lathes. These would need to be sourced from hardware stores or the manufacturer of the specific lathe brand.
- Check the external diameter of the chuck is not to big and with rotate smoothly inside chuck removal pulling device. Critical for OMEC and Wasserman lathe styles.
- 5. Lathe motors spind towards user, the correct Left or Right chuck is designed to self tighten or force the buff to work up the shaft to be tight when it is spinning. If the chuck loosens or the brush falls off the chuck, the the chuck has been put on the wrong side of the lathe.

HANDPIECE MANDRELS

Handpeice HP Mandrels

To suit standard Straight Lab Handpiece Shank Size: 3/32" (2.38mm)

Code	Description
M-LM	Lab-Min Snap On Mandrel - Lab-Mins 1702/1 – 1 Pc Used only Kerr Lab Min polishers.
M-SM	Spiral Mandrel 301L (4004-HP) – For Acrylic Polishers – 1 Pc Used for unmounted rubber polishers, felt cones, rubber points.
M-SO	Moore Snap On Mandel – Suits Moore Discs – 1 Pc Used only for Moores discs.
M-S303	Screw Mandrel 303 (4001-HP) – Suits Discs - Standard Shank – 1 Pc Used for mounting Separating Disc, Cutting Discs, Polishing Wheels, Softcrack Wheels, Felt Wheels, Mizzy Heatless Wheels etc
M-S305	Screw Mandrel 305 (4007-HP) – Suits Discs - Reinforced Shank (Thicker shank at top) – 1 Pc Used for mounting Separating Disc, Cutting Discs, Polishing Wheels, Softcrack Wheels, Felt Wheels, Mizzy Heatless Wheels etc
M-AB1/4	Arbor Band HP Mandrel suits 1/4" Dia (6.3mm) Arbor Bands – 1 Pc Used for Arbor Bands
M-AB3/8	Arbor Band HP Mandrel suits 3/8" Dia (10mm) Arbor Bands – 1 Pc Used for Arbor Bands
DM-GSH	Detax Molloplast Grinding Sleeve Holder Mandrel Pointed – 1 Pc (02616) Used only Kerr Lab Min polishers

BURS – TUNGSTEN CARBIDE

Edenta Tungsten Carbide Burs – Cross Cut Standard – Cut 10 Optimum material reduction and a high-quality surface finish on all types of material. For coarse abrasion on chrome - cobalt alloys, precious metal alloys, chrome - nickel alloys, edenta model cast alloys, acrylics. High quality rotary instruments Made In Switzerland **MADE IN SWITZERLAND Bur Codes Size Guide Example:** 0.018 = 1.8mm Dia 0.023 = 2.3mm Dia 0.060 = 6.0mm Dia **Multibuy Offers** Available ONLINE **Buy 6 Get 1 Free** Buy 10 Get 2 Free Buy 20 Get 5 Free *Cheapest one free Please note: Bur heads are not to scale

BURS – TUNGSTEN CARBIDE

Edenta VOLCANO DLC Coating

VOLCANO TC Cutter - cut 10

For coarse abrasion on chrome-cobalt alloys, precious metal alloys, chrome-nickel alloys, model cast alloys, acrylics.

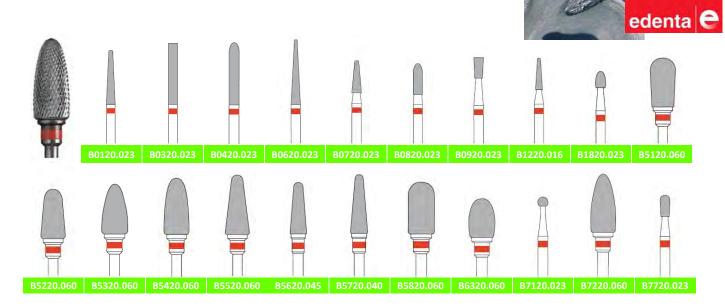

Volcano - Tungsten Carbide Cutter with DLC hardening for increasing the performance, combined with a high cutting capacity and maximum service life. The DLC wear protection creates a hard cutter with a smooth, porosity-free cutting surface. This increases the cutter hardness and reduces the frictional resistance. The wear resistance is increased and premature breaking out of the cutter blades is prevented, which considerably extends the service life.

7220.060HF

Edenta TC Cross Cut - Cut 20 - Fine (Red Band)

Suitable for all dental materials. It smoothens the surface and it enables accurate operation on any structure.

Edenta TC Cross Cut - Cut 53 - Crosscut Fine / Coarse

Used for trimming denture base acrylics.

The newly developed VZ53 (fine-coarse), is an intermediate stage between coarse and medium cross-cut, which is specially tailored to trimming in acrylic work. It has very efficiently cutting blades for high material reduction. The fine-coarse Z53 is easy to use, does not catch and produces smooth material surfaces, which can then be easily polished. Speed opt. 15,000 rpm.

Bur Codes Size Guide Example:

0.018 = 1.8mm Dia 0.023 = 2.3mm Dia 0.060 = 6.0mm Dia

BURS – TUNGSTEN CARBIDE

TC Plain Cut Burs

For all dental materials – the plain cut enables a smooth cutting pattern, particularly on resins, and thus reduces rework.

Blue TC Cut 70 - Plain Cut Standard

Black TC Cutter – cut 85 - Plain Cut Coarse - For bulk abrasion on plaster and acrylics.

Other bur sizes that are not shown in our catalogue or online are available as special order items from manufacturer. Leadtime 3-4 weeks – Please contact us.

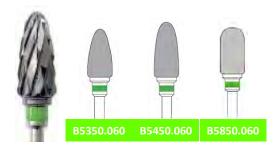

Bur Codes Size Guide Example:

0.018 = 1.8mm Dia 0.023 = 2.3mm Dia 0.060 = 6.0mm Dia

TC Cross Cut - Coarse

Cut 50

For efficient reduction of resins incl. tray materials as well as plaster.

TC Cross Cut - Super Coarse Cut 55

Black Solid Ring – Super Coarse - For gross reduction of resins and plaster as well as resin-based tray materials.

TC Cross Cut - Medium Coarse Cut 51

3 Black Ring – Cross Cut Medium Coarse - For bulk reduction on dry plaster.

BURS – TUNGSTEN CARBIDE

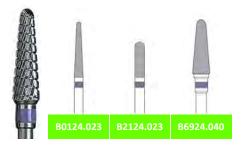

Edenta TC Cross Cut - Cut 30 - Super Fine (Yellow Band)

For fine finishing of gold, alloys and all versions of resins & composites – due to the special cut also ideally suited for ceramics avoiding occurrence of crackles. Suitable for Zirconia.

Edenta TC Cross Cut - Cut 24 – Spiral Fine Cut (Purple Band)

Ensures an exceptionally fine cutting surface on all alloys – especially on titanium since the special cut pattern avoids clogging.

Edenta TC Cross Cut - Cut 25 - Spiral Superfine

(Purple 3 Strip Band)

Excellent cutting performance and facilitated chip removal on tough materials like titanium and NP alloys, P metals, plaster of Paris, model castings, veneer resins, prosthetic resins.

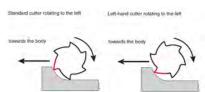

Other bur sizes that are not shown in our catalogue or online are available as special order items from manufacturer. Leadtime 3-4 weeks – Please contact us.

Edenta TC Cross Cut - Left Hand Cutter

Special cutters for left-hand use in 3 types of cut. Reverse rotation cutting towards the body and a clear view of the preparation surface ensure safe, precise left-hand operation.

Please note: Bur heads are not to scale

0.018 = 1.8mm Dia 0.023 = 2.3mm Dia

0.060 = 6.0mm Dia

BURS – TUNGSTEN CARBIDE

Edenta TC Cross Cut Transverse Section - Cut 65 (White Band)

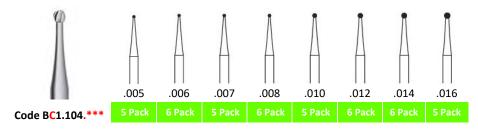

For trimming of PMMA materials. The type of blade enables quick material removal with a sharp cut without heating the material, does not snag and produces smooth material surfaces, allowing them to be easily polished.

Edenta C1 TC Tungsten Carbide Bur Finishers – Round

The contouring fissure bur C1 with a tiny tip diameter of just 0,2 mm is particularly suitable for shaping fissures on a variety of materials. Be it on gold, composite veneers or ceramics prior to final firing, the instrument always displays convincing cutting property and an impressively long service life.

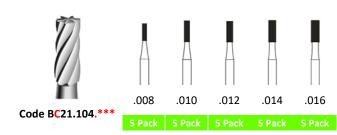

Edenta C2 TC Bur Finishers – Inverted Cones

Other bur sizes that are not shown in our catalogue or online are available as special order items from manufacturer. Leadtime 3-4 weeks – Please contact us.

Edenta C21 TC Bur Finishers - Cylinder

BURS – SPECIAL CUTTERS

TC Fissure Bur C515

Fissure burs are ideal for removing excess material of thermoform materials. Designed specifically for use when thermoforming and cutting out bruxism splints, orthodontic appliances and baseplate for bite blocks. Axial drilling through foils with the cutting tip. Controllable cutting widths due to the conical cutting section. The special cutting geometry prevents smearing with soft materials.

- 25,000 rpm, soft materials
- 5,000 10,000 rpm, harder materials
- Minimum pressure

Bur Codes Size Guide Example:

0.018 = 1.8mm Dia 0.023 = 2.3mm Dia 0.060 = 6.0mm Dia

TC Repair Cutter C108

Used to roughen up denture acrylics as well as for processing of retentions onto acrylic teeth. 5.000 rpm

BURS – SOFT ACRYLIC / SOFT LINER

Rubynit

Ruby coated premier cutting tool

Rubynised grinding instruments permits precise trimming of acrylic dentures without any heat generation.

Most suitable for correction on soft acrylics and relines.

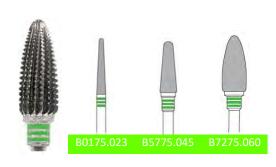

Soft Liner TC Cutter - Cut 75

For trimming of soft acrylics / soft relining.

Plain toothing with transverse section.

No smear effect during cutting, negligent heat development thus no separation of acrylic and relining material.

DIAMOND DISCS

Sintered Diamond Discs - Plaster

Diamond disc with sintered rim for dies, tooth arch separation **on plaster**

Thickness 0.30mm
Dia Ø 30mm – RPM 10,000

Superflex Discs

Superfine grit diamond disc for very finely separating and contouring porcelain.

Thickness 0.12mm
Dia Ø 22mm – RPM 15,000
ED\$355.504.220

Serrated Diamond Disc with Fine diamond grit, for separating ceramics, plaster, acrylics, resin veneers.

Thickness 0.15mm Dia Ø 19mm – RPM 20,000

EDS705.514.190HP

Thickness 0.15mm
Dia Ø 22mm – RPM 15,000
EDS705.514.220HP

BURS – SINTERED DIAMOND AND DIAMOND

Sintered Diamond Burs

Sintered Diamonds consist of diamonds throughout, with a metal bond for firm hold. The high quality diamond grit and finest special metal bond used for the manufacture of Sintered Diamond Instruments are providing an absolute guarantee for achieving ultimate grinding results. RPM 20,000 – 25,000

Diamond Rotary Instruments For Precise Preparation

Optimum material reduction and a high-quality surface finish. The optimally coordinated diamond grit and instrument designs ensure a long service life and high cutting capacity when preparing and separating porcelain, facing composites and model materials. Instruments specifically tailored to the relevant material and technique.

DIACRYLIC Grinders

Diacrylic Grinders - DG410.104.065 and DG420.104.065

Multifunctional diamond rotary instrument for rapid, accurate preparation of denture acrylics. The special head designs are suitable for preparing sublingual rolls, papilla contours, and denture peripheries as well as labial and buccal frena. RPM 15,000

Hollow Diamond Grinder - DG490.104.090

Ideal for removing large areas of acrylic with its high cutting capacity and minimum heat generation. For pre-trimming orthodontic and denture acrylics and preparing customised impression trays and soft denture liners. RPM 10,000-15,000

DUO-DIACRYLIC Grinder

For pre-trimming orthodontic and denture acrylics and preparing customised impression trays and soft denture liners. Special diamond coating with chip removal channels ensures removal of large areas of acrylic with maximum cutting capacity and minimum heat generation. RPM 15,000

Contents: 1 Piece Per Box

Diamond Burs - 801 - Round

Optimum material reduction and a high-quality surface finish.

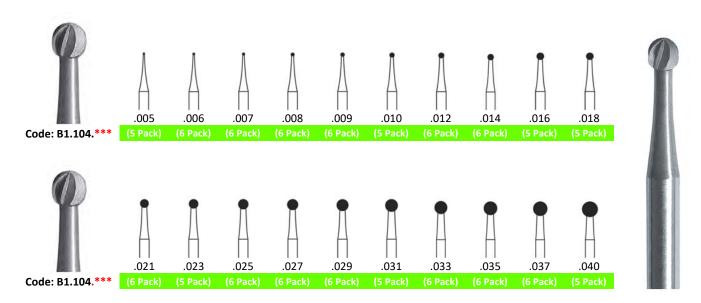

BURS – STEEL

Steel Bur Instruments For Precise Preparation

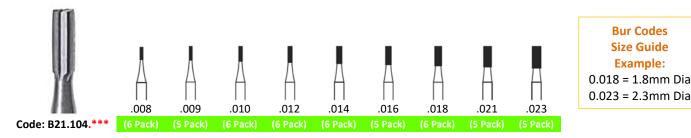

Optimum material reduction and a high-quality surface finish. The optimally coordinated cutting blade geometry and cutter designs ensure a long service life and high cutting capacity when preparing stone, acrylic, metal and precious metal. Instruments specifically tailored to the relevant material and technique.

WIRE PRODUCTS – MESH & REINFORCEMENT

Itsoclear Clasps – Adjustable Plastic

Itsoclear Clasps provides the ability to produce and repair a clasp in less than 4 minutes with cosmetic appeal unlike any other clasp. Requires mechanical retention. Use Itsoclear clasps for: repairs, acrylic partials, cast partials with clear clasps in less than 3 minutes, Replace metal clasps on existing partials, Acrylic Nesbit with clear clasps.

Clear Universal Clasps. Recommended use on pre-molar/anterior teeth.

Foliflex Bleach Aldente (Germany) - Soft EVA

Bleaching trays, fluoride trays, medication trays.

Colour: transparent. Material Characteristics: Very well thermoformable, flexible material with high elasticity. Does not bond to acrylate. Hardness Shore A: 95. Chemical characteristics: EVA: ethyl-vinyl-acetate. Harmless to health, BgVV (Federal Health Office) listed thermoplastic with tested biocompatibility. Insoluble in water, inactive, harmless to ground water.

120mm Round

Code	Description	
A-EFB-1.0	Aldente Foliflex Bleach 1.0mm - 120mm Round – Clear - Pack 20 (581-012-053)	

Speciality Thermoforming Material – Soft Non-Bonding

Folilen / Erkolen

Soft, resilient material. Burns without residues.

Does not bond to acrylics or composites. Moulded pieces, provisional crowns and bridges (as a template), gingival dressings and as a spacer for medication trays (e.g. fluoride) - Chemical characteristics: PE: polyethylen

Code	Description

THERMOFORMING MATERIAL - SPLINT MATERIAL

Splint / Retainer / Aligner Material - Hard

For hard splints - thin splints - surgical trays - orthodontic retainers - clear aligners and bleaching trays.

Clear Aligner Systems – General use material from 0.6mm - 0.7mm - 0.8mm & 1.0mm at different treatment stages. Thinner at the start and thicker towards the end of treatment.

Clear stiff material that acrylic sticks to. Bonds to acrylics.

Available in 127mm Square and 120mm Round.

Proform (Keystone) USA

Prevent Bubbles In Material
All Splint material is susceptible
to absorb moisture from the air
that will create bubbles in the
material when heated. Material
must be stored in air tight
container or ziplok sealed bag in
a cool dry place. To make use off
effected material, place the
material in an oven at 70 degrees
maximum for 1 hour to draw
moisture out of material.

TOOTH WHITENING & RELATED ITEMS

SNORING DEVICE

The Zeta Med (zMDSA) concept was originally designed in conjunction with Australia's leading Dentist's, Sleep Physician's and Dental Technician's to overcome the limitations of all other appliances available to treat the needs of their patients.

This device is for use by a dental laboratory for the manufacturing of a snoring device from a patients own impressions using dual laminate hard / soft splinting material. It ensures the greatest retention, comfort and durability for the wearer.

Can also be used in a full acrylic splint.

Code	Description

Lab Pan / Job Boxes / Work Pans

Available In: Blue, Red, Green, Yellow and White

Lab Work Pans are a great way to organize your laboratory. As cases arrive, sanitize the impressions or appliances and place them in lab pans to protect them from contamination. The pans are offered in a variety of colours, so they can be easily organized. Use a different colour tray for each day of the week or try using a different colour tray for ingoing and outgoing work.

Size: 177.8mm D x 127mm W x 63.5 mm H (Excluding High Part At Back)

Code	Description
WP-K	Lab Pan Job Box With Job Card Clip - Single 1pc

Plaster & Stone Remover

Devest - Very efficient in breaking down stone and plaster when cleaning dentures, instruments etc. Suitable for both soaking & ultrasonic cleaning. Pre-mixed ready to use.

Renfert GO2011 - Suitable for cleaning different instruments and aids quickly and thoroughly in only 50% of the time in comparison to conventional plaster and alginate solvents. Efficient removal of stubborn residues in a cleaning bath and even faster in an ultrasonic unit. Ready-to-use solution in a handy canister.

Code	Description
DDV	Durodent Devest, 5L
R-GO2011	Renfert GO 2011 Speed Plaster And Alginate Solvent, 2L (20120000)

Tartar & Stain Remover

Powerful ultrasonic acidic detergent removes calculus, tartar, tobacco, food stains and permanent cement from bridges, dentures and orthodontic appliances. Biodegradable and phosphate free.

Code	Description
CTSR	Crosstex Tartar & Stain Remover, 3.7L

Non - Stick Spray

Non – Stick separating spray is applied to dry plaster models. Ideal for all pin models.

Non – Stick forms a layer and plaster can be poured onto it immediately. Non – Stick protects trimmers, flasks, articulators, vibrators and acrylic and rubber parts from sticking plaster by silicone film.

Code	Description
ANS	Hager Werken Non Stick Spray, 400ml

Brush Cleaner - Kulzer Palaclean

The Palaclean brush cleaner helps you keep your brushes clean.

For example, it will remove sealing lacquer residues without trace after using Palaseal. Soak the brush in Palaclean for a few minutes, rinse briefly with fresh water and then leave to dry.

Code	Description
HP-PC	Kulzer Palaclean, 45ml, 6470 8064

Adhesive (Superglue)

Magic TA40E – Excellent general purpose superglue adhesive. Runny viscosity.

Renfert Instant Adhesive - The multi-purpose one. Specially for bonding "recently set" stone (approx. 5–6 hrs after pouring the impression). Ideal for sealing. All-round glue for use with plaster, metal, acrylics and porcelain. Viscosity approx. 14

Renfert Liquicol Adhesive - Very low viscosity special glue for sealing dies and stone models. Hardens the surfaces of dies, alveolar ridges and opposing dentitions. Viscosity approx. 1.3

Code	Description
SG-M	Magic Superglue TA 40E, 18g
R-SG-1	Renfert Instant Adhesive, 1 x 10g , Single Bottle (1733-01**)
R-SG-6	Renfert Instant Adhesive, 1 Pack (6 x 10g) (1733-0100)
R-LSG	Renfert Liquicol, 2 x 20g (1732-0020)

Dosing Bottles and Nozzles

Code	Description
	Liquid / Powder Dosing Bottle With Cone Lid (Red Cap),
DB-100	Plastic, 100ml (162-100-00)
	Use with metal nozzles for power and liquid.

Bench Blocks

Code	Description
Code	
BBG	Metal Bench Block With Rubber
BBG-R	Rubber For Bench Block

Orthodontic Model Base Formers - Rubber

For quick clean construction of models. With these base formers a firm seating is achieved in the articulator with no cutting or sawing.

The plaster is contained within the mould and when set, the model can be easily removed. The preformed shape reduces trimming.

EQUIPMENT - ARTICULATORS

Plain Line Articulators

The Plain Line Articulator consists of a simple hinge joint. No lateral or sliding movements are possible ensuring absolute accuracy of measurement.

Code	Description
AT-GP-G	Gibling Plain Line Articulator – Gun Metal (Heavy Duty)
AT-GF	Gibling Fork Articulator – Gun Metal (Heavy Duty)

AT-SA Aluminium Semi Adjustable

Semi Adjustable Articulators

Semi Adjustable articulators offer excellent lateral posterior visibility.

- Average lateral articulation and protrusion values.
- Upper and lower parts easy to separate.

AT-SA - The **Original** Italian Made Semi Adj Articulator – Strong Design. Extremely light weight, very manageable.

Code	Description
AT- SA	Larident G99 Aluminium Semi Adjustable Articulator (Previously known as Errety) - The Original - Made In Italy - 1pc Dimensions: 95mm W x 135mm L x 55mm H.
AT- L30	Labo-Mate 30 Free Plain Articulator Lightweight (210g only). Removable pins for fast mounting and removal of models. Vertical bow distance 63 mm.
AT- L80	Labo-Mate 80 Magnetic Free Plain Articulator

Labo-Mate 30

Labo-Mate 80

Plasterless Articulators

Galetti Original, probably the best known plasterless articulator on the market. Well regarded by most technicians the Galetti is lightweight and easy to use. Solidly constructed from Aluminium and Brass. Hard wearing and corrosion resistant.

Code	Description
AP-GO	Galetti Plasterless Articulator - Original Genuine –
	Brass/Aluminium – Made In Italy

EQUIPMENT - ARTICULATORS

Fully Adjustable Articulators

Labo-Mate 90 - The Labo-Mate 90 Articulator is an articulator that combines the advantages of easy use, simplicity and ability to check fluctuations of the vertical dimension in the mean value articulator. Magnetic Mounting System

- Lateral incisal path guide angle 10°, Vertical bow distance 70 mm, Intercondylar distance 100 mm, Sagittal condylar guidance inclination 20°
- Weight 300g

Stainless Steel Flask Clamp - Bolted

Excludes Flasks.

Made from 316 Stainless Steel* Non-Magnetic

(* Stainless steel may tarnish and present some surface discolouration / rust depending what contaminants are in the water bath and water salinity)

Code	Description
FCMB-2	Bolted Flask Clamp SS, 2 Flask (R-030400) Size: 0-145mm H x 115mm W. 1.9kg
FCMB-3	Bolted Flask Clamp SS, 3 Flask (R-030410) Size: 0-215mm H x 115mm W. 2.1kg

Flask Manual Press

Excludes Flasks.

Code	Description
FPG-2	Gibling Chrome Plated Bench Mount Manual Press, 2 Flask
FPG-3	Gibling Chrome Plated Bench Mount Manual Press, 3 Flask

Hydraulic Bench Presses - Refer to equipment section.

EQUIPMENT – POLYMERISATION

Polymerisation Unit – Programmed

Kulzer Palamat Premium NEW MODEL

Palamat® Premium – smaller outside, smarter inside One water-bath polymerisation device for all.

Palamat Premium features a wider opening, greater capacity, a space-saving design, improved water drainage and intuitive software with pre-set programmes that can be adapted to meet any need

Benefits at a glance:

User friendly

- Temperature, pressure & time always visible
- Common programmes pre-set, yet fully adaptable
- Icon-based, interactive operating menu. No languages

Everyday simplicity

- Wider opening, larger capacity & smaller footprint
- Fits standard articulators or six dentures
- Proven pressure lock system

Clean-lab design

- Optimised surface for easy cleaning
- Improved water drainage
- Functional in all conditions and clean-wipeable

Capacity

- Up to 6 full dentures
- 1 x Standard Articulator with denture
- 3 x Palajet duo flasks

EQUIPMENT – POLYMERISATION

Pressure Pots and Accessories – Polymerisation using compressed air for pressure.

Used to polymerise repairs, additions and relines under pressure which helps removes porosity and reduced colour change in treated prosthesis using self cure acrylic in order to improve work quality.

Pressure Pots – A very manual polymerisation method. Pressure pots (4.5I / 7I pots) are used by manually filling them with warm / hot water (50-60 °C) and using compressed air to pressurise the tank to approximately 1-2 bar. These models can be heated on hot plate on an electric hot plate to maximum 55°C. Hot plate can be purchased from white good electrical store like Good Guys / Harvey Normans.

Code	A-AP4.5	A-AP7
Brand /	Aldente Aqua Pressure Pot 4.5L (581-009-025)	Aldente Aqua Pressure Pot 7L (581-009-027)
Model	4.5L suitable for most applications unless trying to put in a large articulator or something	7L just offered a little more height in tank which is not normally required
Size	Can be heated on hot plate - Temp: max 55° C Diameter (Int): 220 mm Height (Int): 120 mm Operating Pressure: max 2 bar Includes push on Air Filling Hose (Like bicycle valve connection) Compressed air connection required to suit your labs internal air lines / air fitting style if not the same as one provided with unit Weight: 2.4 kg / 4.5 Litre 12 Month Warranty ** Replacement seals and parts available	Can be heated on hot plate - Temp: max 55° C Diameter (interior): 220 mm Height (interior): 210 mm Operating Pressure: max 2 bar Temp: max 55° C Includes push on Air Filling Hose (Like bicycle valve connection) Compressed air connection required to suit your labs internal air lines / air fitting style if not the same as one provided with unit Weight: 2.8 kg /7 Litre 12 Month Warranty ** Replacement seals and parts available

Hydroflasks – Polymerisation using water compression for pressure.

Used to polymerise repairs, additions and relines under pressure which helps removes porosity and reduced colour change in treated prosthesis using self cure acrylic in order to improve work quality.

Used by filling them with warm/hot water and using a clamp to create a small amount of pressure in the pot manually.

Code	E-HF	E-HFC

EQUIPMENT – LIGHT CURING UNITS

Hilite Power 3D - Kulzer

HiLite power 3d is our high-performance light-polymerisation unit for safe and efficient polymerisation of all light-curing dental and 3d printing resin materials. Ideal for pre and final polymerising light-curing composites from the Signum, 3D print, Pala and many other product ranges. The appealing design and the selection of three different lighting times with 6, 90 and 180 seconds makes HiLite power a real all-rounder. It creates the perfect polymerisation for all light curing dental materials including composites, bonding materials, special trays, sealing enamels and blocking-out materials etc. Wide light spectrum (390 – 540 nm), short polymerisation times, efficient heat management.

EQUIPMENT - THERMOFORMING

Thermoforming Machines – Different technologies – Pressure & Vacuum forming. See below

Code	A-DFP	K-VFM3
Brand / Model	Aldente Dunaform PLUS (NEW) V2 Improved Functions - Programmable Pressure Former - 581-003-006	Keystone / Proform Vacuum Former - Machine III (3) 7000332
Specs.		Watch Keystone video online — how to use machine. Search Youtube-Keystone Pro-Form Basic Forming The Machine III has been a staple in Keystone Industries' long-lasting line of highly recommended vacuum former machines. Please be aware: A Vacuum Former moulds the material by drawing (sucking) down the material over the model with a vacuum pump from the bottom. (Different to a more expensive Pressure Former technology, that push down material from top with high pressure compressed air to give superior adaption results) Machine for processing bleaching trays, sports mouthguards, implant stints, temporary splints, customer impression trays, denture bases, copings, temporary crowns, bridges and orthodontic appliances. Manual heating and vacuum times. User must control and judge the process. Uses 127mm Square Thermoforming Material TIP: When using with Dual Laminate / Hard Soft Material — preheat fitting surface of material sheet before flipping the material and completing full heating cycle. Typical Heating and Vacuum Time Preheat for 2-3 minute or to the Heating Coil turn an orange colour. (Traditional Vacuum forming machines use ceramic element that takes longer to heat than more modern Pressure formers that us more instant heat infrared Heating elements) Visually check material as it heats to check how soft and saggy it is as it begins to heat. Depending On Material Thickness 1 mm Thick - 1 min. 30 sec heat /10 to 15 sec. Vacuum / 5-10 min cooling Amm Mouthguard - 2 minutes Heat / 15 to 20 sec. Vacuum / 5-10 min cooling Made In the U.S.A. 12 Months Warranty See Youtube Videos

Steam Cleaners

Code	W-SCII-W		
Duou d /	Wassermann Wasi-Steam Classic II – Manual Fill		
Brand / Model	White 174996A #CCWH#		
iviodei	NEW MODEL – Replaces original Classic		
	Compact format, strong performance		
	Manual Fill		
	Boil Capacity Volume 3.3 litres		
	Output: 1200W Special Steel Heating Element		
	Max Working Pressure 5.0 Bars		
	Variable working pressure		
	Short heat-up phase		
	Steam Temp: approx. 158°C at 5 bar		
	Sound level: ≤ 70 dB (A)		
	Wall mounting possible – Kit included		
	Weight 11kg		
	12 Months Warranty		
	Made In Germany		
	Important - Distilled water (purified) (Different from Demineralised) must be used in all manual filled steam cleaners or warranty will be void.		
	Water impurities and minerals found in water will overtime cause lime scale build-up and other minerals which can block parts of the internal		
Specs.	workings of the machine. By using Distilled Water you can greatly improve the life span of this device and its components. * Issues caused by water		
	supply quality are not covered under warranty.		
	Distilled water is water that has been boiled into vapor and condensed back into liquid in a separate container. Impurities in the original water that do not boil below or near the boiling point of water remain in the original container. Thus, distilled water is one type of purified water.		
	Water supplied from your taps and what is Hard Water?		
	Minerals in the water supply (called HARD WATER) overtime can start blocking some components and make valves that open and close in the machine		
	get stuck, so they do not function properly and need to be cleaned / replaced.		
	Hard water is water that has high mineral content (in contrast with "soft water"). Hard water is formed when water percolates through deposits of		
	limestone, chalk or gypsum which are largely made up of calcium and magnesium carbonates, bicarbonates and sulphates. During its journey from the		
	source into your taps, water dissolves these minerals and carries the microscopic particles through your pipes.		
	When hard water is heated, the minerals leave the water and are deposited on outlets and inside appliances, significantly decreasing their lifespan		
	While it may be difficult to imagine how tiny amounts of calcium and magnesium can have that much of an effect, the difference between hard and		
	soft water can be immense on your plumbing.		
Capacity	3.3L Volume		
Size	W x H x D max.: 245W x 350 Hx 315D mm		
	W x H x D (housing): 200W x 305H x 310D mm

Sand Blasting Units Accessories – Blasting Nozzles

The quality and speed for sandblasting castings depend on the combination of abrasive agent and sandblasting nozzle as well as on use of the optimum sandblasting technique. Service life of nozzles four times longer than that of standard nozzles, as they are made of a highly resistant high-tech material. Excellent control and focusing of the abrasive agent due to the extended shape of the nozzle.

EQUIPMENT – FUME EXTRACTION

Fume Extractions Cabinets

The SafeGuard™ ductless fume cupboard offers laboratories a portable, economical and environmentally friendly fume cabinet; protecting the operator from toxic gases, noxious fumes and particulates. Designed and manufactured here in Australia, the SafeGuard™ requires no ductwork and minimal installation.

Code	LS-SG800	
Brand / Model	SafeGuard Ductless Fume Cupboard SG800 Including LSF100 Monomer Filter	
	Includes:	
	LSF100 Monomer Filter 600mm - Methyl Methacrylates	
	Interstate Grade Packaging On Pallet and Cardboard Wrapped	
Specs.	No Ducting Required	
	Minimal installation - plugs directly into a standard 220V 10AMP electrical outlet.	
	Extremely quiet operation < 60dB	
	Filter To Suit Esters - Methyl Methacrylates	
	*Excludes Trolley	
	External: 800mm W x 600 D x 990 H	
	Internal: 790mm W x 500 D x 680 H	
Size	Weight 60kg With Filter	
	12 Months Warranty	
	MADE TO ORDER – SPECIAL ORDER ITEM	

EQUIPMENT – ACRYLIC INJECTION SYSTEM

Kulzer Palajet[®] Injection System With Palajet[®] duoflask and Palamat Premium

The Kulzer pneumatic injection unit is not only suited to match the material characteristics of PALA denture acrylics, but is also very easy to use. The ingenious feed system cuts out dosage errors and provides a consistent process.

- Precision engineering for injection denture fabrication
- For injection of heat-curing and cold-curing acrylics
- No increase in the vertical dimension
- Hardly any finishing needed
- Maintenance-free, effortless operation
- → Refer to page 22 for more information.

K-EC-PC	*Ideal for cleaning smaller items and working with acids. Can be also used in conjunction with the stainless steel cover.		

EQUIPMENT – CASTING UNITS

Kulzer Casting Machines

Casting technology - a core competence

Kulzer introduced the vacuum pressure casting process to the dental laboratory back in 1969 and has been enhancing it continuously ever since. Kulzer casting machines have become increasingly versatile, reliable, compact and economical over the years.

Heracast IQ - SPECIAL ORDER ONLY 8 - 12 Weeks

Compact tabletop unit with induction heating, high-performance high-frequency generator as well as integrated vacuum pump and cooling for gentle melting and casting under vacuum.

Kulzer Heracast Pressure Accumulator Tank 6600 8921

(required in case of insufficient compressed air line diameter)

Advantages:

HHC-PT

- Fine-grain, dense casts with smooth surfaces;
- No metal loss during casting;
- Low metal consumption because casting reservoirs and exhaust channels are not required;
- No inclusions of graphite or porcelain particles in the cast object;
- Fast casting sequence;
- Optimum chamber mechanics for an easy mould placement and alloy loading;
- Automatic or manual release of the casting process during main melting;
- 6 languages selectable;
- Memory for the storage of up to 100 alloy names and their casting parameters.
- Technical data: 77.0 x 45.0 x 49.0 cm; 230 V, 50/60 Hz; nominal output 2600 W; generator output 2000 W; input pressure 4 to 7 bar; operational pressure 3.3 bar; casting temperature max. 1750 °C; casting quantity max. 130 g precious metal and max. 60 g non-precious metal; casting sequence 3-5 min; vacuum max. 50 mbar; water cooling integrated approx. 2.5 l; software update with RS232 interface; 65.0 kg.

Heracast EC - SPECIAL ORDER ONLY 8 - 12 Weeks

Code	Description
HHC-EC	Kulzer Heracast EC Vacuum Pressure Casting Unit - 15 AMP Power Circuit Required - 1 piece 6604 1213
HHC-VP	Kulzer CL-P Vacuum Pump, Type 7 6600 2450

Induction heated, with integrated water cooling.

Advantages:

- Material-saving, professional vacuum pressure casting;
- Innovative chamber locking technique increases operating safety;
- High efficiency of the induction unit reduces operating costs;
- Easy operation with rotary knob and animated display;
- Booster mains adaptor with increased voltage for high efficiency during melting;
- High performance counter stream cooler and ventilators provide efficient and silent cooling.

Also available – Hera Silicone Rings / Casting Rings & Cone Formers - See Kulzer catalogue online.

LASER WELDER

Laser Welder

Code	O-DADO	
Brand / Model	Omec DADO Laser Welder - 20 Joule - DADO.19.00	
	DADO is the ever-existed WELDING MACHINE: small, with a unique design, modern, clean, intuitive. DADO is the welding machine that costs like a spot welder but with all the benefits and advantages that the laser gives compare to an arc-welding machine.	
	Fixation of parts of orthodontic appliances. Porosity fixing after casting. Fixing attachments, joints, brackets, and anchors. Denture adjusting, bridges, caps and implants.	
	DADO is supplied with an App, which univocally links to the serial of the product. This App allows full control of the laser and all its parameters. DADO can be used with your smartphone.	
	The variable color of the LEDs in the welding chamber is also another indicator of the laser status. The same LEDs change the color relating to the laser working status: standby, in low or high power operation mode.	
	Unbox, fill, plug-in and start welding whatever you want. The laser does not require special installations. Today welding is almost a child's play.	
Specs.		
	Technical data:	
	Laser source and wavelength: YAG 1064 nm	
	Impulse time: 0,1 ÷ 6 ms Spot diameter: 0,2 ÷ 1,5 mm	
	External control: App on mobile	
	Input power: 110/230 V CA, 50/60 Hz	
	Max power: 1,8 kW	
	Average power: 150 W	
	Ampere: T16A	
	Weight: 15 kg	
	Cooling: Liquid	
	Working environment: 17-35 ° C UR 65% NON CONDENSING	
	Made In Italy	
	12 Months Warranty

PRE HEATING FURNACE

Renfert Preheating Furnaces

Code	R-MC	R-MC-C	R-MS
Brand / Model	Renfert Magma (Excluding Flue) For Use With Catalyst Converter 220- 240V 23000500 MOST POPULAR SETUP	Renfert Catalyst converter 220- 240V - 50/60 Hz 23000001	Renfert Magma with Standard Flue 220- 240V 23000000
Specs.	Magma is a preheating furnace with all the technical features, which fulfil all the requirements in terms of programming, handling and ergonomics. Four-sided heating ensures uniform heating in the entire furnace chamber. Quick heat rate: to 900°C (1654°F) in only 60 min. 99 Program storage spaces + 1 Program for speed investments. Catalyst Converter attachement - Removes about 60-70% of fumesl. Still requires external ventilated installation for remaining air / fumes. Preheating furnaces with Art. no. 2300.x500 have been set up for operation with a catalyst converter and are delivered without a flue. The catalyst converter (Art. no. 2300.0001) must first be installed before the oven can be operated. *Can be retrofitted with standard flue sparepart 3 Year Warranty – Made In Germany	Reduction of unpleasant odours and smoke thanks to catalytic post-combustion of furnace gases. Intelligent control via the Magma. Increase in service life thanks to automatic switch-off at 650°C (1202°F). The catalyst converter operates continuously when using the speed program. Removes about 60-70% of fumes. Still requires external ventilated installation for remaining air / fumes. Perfect for labs that are located next to other tenants or people to reduce fumes. Mounts to the rear of the Magma unit once flue is removed.	Magma is a preheating furnace with all the technical features, which fulfil all the requirements in terms of programming, handling and ergonomics. Four-sided heating ensures uniform heating in the entire furnace chamber. Quick heat rate: to 900°C (1654°F) in only 60 min. 99 Program storage spaces + 1 Program for speed investments. Requires External Ventilation Installation For Fume Removal from the flue *Unit can be retro fitted with catalyst convertor by removing flue. 3 Year Warranty – Made In Germany
Size	Weight (incl. catalyst converter) – 35kg Dimensions (W x H x D) 430 x 610 x 550 mm	Weight: 4,8 kg Dimensions (WxHxD): 190 x 370 x 170 mm	Weight (incl. flue) – 30kg Dimensions (W x H x D) incl. one handle and flue 430 x 500 x 440 mm

The A-silicone that impresses. With precise fit and flexibility.

• For your safety: Flexitime offers outstanding precision thanks to the balance of physical properties at the highest scientific level.

- For your convenience: The intelligent time concept enables stress-free, time-efficient working with a high level of flexibility.
- For your excellent reputation: Flexitime is the problem solver* even for challenging cases because excellent impressions form the basis for precisely fitting prosthetics and satisfied patients.

* Dental Advisor 2012: Distinction as "Clinical Problem Solver".

Giving a hand to oral health.

Zhermack - Polysiloxane Impression Material

Code	Description
Z-OL	Zhermack Oranwash L, Light – 1 x 140ml C100660
Z-TM	Zhermack Thixoflex M, Medium - 1 x 140ml C100670
Requires Activator: Zhermack Indurent Gel Activator, 60ml (Code: ZPA)	
Mixing Pads: Refer to Impression Accessories page	

Oranwash L - Low viscosity C-Silicone. Ideal for two-stage technique, single-stage technique with two viscosities . Hydrophilic, Yellow colour, Orange flavour. Setting Time: 5:00 Mins

Thixoflex M - Medium viscosity C-silicone. Removable prosthesis relining, Ideal for singlestage technique with two viscosities, Two-stage technique. Mucostatic (not compressive for the soft tissues). Hydrophilic, Thixotropic, Light blue colour. Setting Time: 5:30 Mins

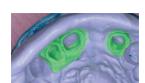

IMPRESSION MATERIAL – A SILICONE (VPS)

Vinyl Polysiloxane (VPS) - A Silicone (Rubber Base)

Vinyl Polysiloxane Impression Material (VPS) is a hydrophilic material used for dental and gingiva impressions. VPS enables a dentist to make more accurate impressions that resist distortion and tearing when being removed. This allows for better fitting restorations.

Flexitime VPS System - Kulzer

The VPS precision impression material Flexitime yields compulsory precision and accuracy of impression by balance of clinically relevant physical properties.

Indications: Crown and bridge impressions, Inlay and onlay impressions, Implant impressions, Fixation and transfer impressions, Functional impressions.

Implant/Transfer (Partial Denture) Impressions - Monophase (One material, one step) or Double-Mix (Two materials, one step) Heavy Tray / Correct Flow

Use 1:1/2:1 Impression Cartridge Gun

Working Time / Time in Mouth: Consistent 2 Minutes 30 Seconds

Code	Description	
HF-CF	Kulzer Flexitime Correct Flow, Light (Green), 2 x 50ml Includes: 12 x Mixing Tips (1:1) (66002186) (Shore A 38)	
HF-M	Kulzer Flexitime Monophase, Medium (Purple), 2 x 50ml Includes: 6 x Mixing Tips (1:1) (66002200) (Shore A 58)	
HF-H	Kulzer Flexitime Heavy Tray, Heavy (Violet), 2 x 50ml Includes: 6 x Mixing Tips (1:1) (66002193) (Shore A 72)	

Flexitime DYNAMIX Machine Refills - Kulzer

IMPRESSION MATERIAL – FAST SET VPS A SILICONE

Hydrorise VPS Fast Set – Zhermack

Made In Italy.

High performance for Hydrorise, the hyper-hydrocompatible A-Silicone for high precision impression, which adapts to different impression techniques (double step impression, simultaneous impression with double viscosity and monophase impression) in various clinical situations. Ideal working time/setting time ratio: Long working time but Shorter permanence in the oral cavity, High dimensional stability. Biocompatible even on damaged mucosa. 5 micron detail reproduction.

Light Body: Working Time: 1:30 (min:s), Time In Mouth 2:30(min:s), Setting Time 4:00(min:s), **(Shore A 45 ± 2) Recommended Applications:** Fixed, Removeable, Implantology

Monophase (Medium Body): Type 1 Heavy-bodied Consistency - Working Time: 1:30 (min:s), Time In Mouth 2:30(min:s), Setting Time 3:30(min:s), (Shore A 60 ± 2) Recommended Applications: Fixed, Removeable, Implantology

Heavy (Heavy Body): Working Time: 1:30 (min:s), Time In Mouth 2:30(min:s), Setting Time 4:00(min:s), **(Shore A 54 ± 2) Recommended Applications:** Fixed, Removeable, Implantology

Optosil Comfort Putty -

All advantages in one system.

- Easy, secure and fast the Optosil / Xantopren Comfort system is a further development of the classic Optosil / Xantopren system.
- Exact reproduction of detail because of Hydrocontrol
- No sensitivity problems during use, especially in relation to latex gloves and retraction solutions
- Easy application using the 4:1 cartridge dispensing system
- Exceptional long term dimensional stability even after 7 days

Handmix Tray material for 2-step technique, Sandwich technique, Functional border for functional impressions. Use with Kulzer Activator Universal Plus (6603 7443) **Colour:** Yellow **Mixing Time:** 30s, **Working Time:** 60 sec, **Setting Time In Mouth:** 4 mins - Shore A Hardness 63

Flexitime® is a vinylpolysiloxane impression material that has a full range of indications and a working time from 1 to 2.5 minutes (total set time 3.5 to 5 minutes). Superior hydrophilicity on a polyether level creates excellent detail reproduction in moist environments. Resist tearing and distortion upon removal with Flexitime's exceptional toughness. Read impressions easily with high-contrast colors.

Handmix VPS material. 1:1 Ratio. **Mixing Time:** 45s, **Working Time:** 60 sec - 2.30min, **Setting Time:** 3′ 30 to 5 mins - Shore A Hardness 70

Zhermack

High initial flowability and excellent rigidity after hardening for the putties

- Thixotropy for the washes
- High tear resistance

Advantages

- Excellent relation between rigidity and elasticity
- Ideal working time/setting time ratio
- High flowability and accuracy of wash materials
- Putty and wash materials with the same catalyst

Code	Description	
Z-ZS	Zhermack Zetaplus Soft - 900ml (1.53kg) C100610	
	Requires Activator: Zhermack Indurent Gel Activator 60ml C100700 (Code: ZPA)	

Zetaplus Soft - Very high viscosity C-silicone Putty, Two-stage technique, Single-stage technique with two viscosities. Colour: Yellow Mixing Time: 30s, Working Time: 75 sec, Time In Mouth: 3.15 mins, Setting Time: 4.30 mins, Shore A Hardness 52

IMPRESSION MATERIAL - OTHER

Xantasil - Kulzer

Impressively convenient (Alginate Substitute) - The addition curing, elastomeric alginate substitute xantasil removes time pressure from the process of creating anatomic impressions. You can pour the impression later and pour it multiple times due to its impressive dimensional stability, since it has such impressive shape stability. It also means that there is no need to take several impressions. Use with 1:1/2:1 cartridge gun. Total Working Time: ≥ 02:30 mins. Mixing Tips: Green

Code	Description	
H-XC	Kulzer Xantasil Cartridge Fast Set 6 x 50ml, 66052102	
H-XD	Kulzer Xantasil Dynamix Cartridge Fast Set 2 x 380ml, 66052101	

Gingival Reproduction (Soft Tissue) Material

A-Silicone fluid for the laboratory reproduction of artificial gums (Gingival reproduction) on the model. For precise reproduction of gingival contours around the margins. Can be used both with direct and indirect technique.

CAD version is scannable without using reflective sprays.

Code	Description
ZG-E	Zhermack Gingifast Pack - Elastic - 2 x 50ml (C430000) + 1 x Separator (C400888) Included - DG
ZG-	Zhermack Gingifast CAD - Elastic - 2 x 50ml (C430002) + 1 x Separator
CE2	(C400888) Included - DG

Zinc Oxide Eugenol – Impression Paste

Code	Description
IM-SSW	SS White Impression Paste, 210g

Zinc Oxide (Eugenol Free) - Impression Paste

Cavex Outline – Eugenol free. For making accurate impressions of soft tissues, in particular the second impression with the individual tray technique for the edentulous mouth, and for rebasing of dentures. Low viscosity.

Code	Description
IM-CO	Cavex Outline, 205g

Impression Compound

Kerr - Kerr Impression Compound comes in cakes of convenient size for full or partial impressions and sticks for copper band impressions or for adding to the periphery of an impression or custom tray. Each colour has a controlled working temperature for a specific use.

Work temperature: Soft Green - 50° - 51°C

Code	Description
IM-KGS	Kerr Green Stick, 15 Sticks, 113g (00444)

IMPRESSION MATERIAL — BITE REGISTRATION

Bite Registration + Clear Material - A Silicone (VPS)

Kulzer - Bite Registration Material

Memoreg 2 — is a **highly filled, pink coloured A-silicone** for all standard bite registrations which can be applied easily and directly in the mouth. **Indications:** Standard bite registrations for crown/bridge work, Fixation of face-bow registers, Coding of bearing devices. Colour: Pink - Final Hardness 90 Shore A. Working Time: 30 Seconds — Minimum Time In Mouth 60 seconds

Memosil 2 - is a transparent A-silicone for special indications. Its transparency allows optical control when positioning aids (e.g. X-ray pellets). Light-curing is possible for filling and fixative materials through placeholders with Memosil 2. Colour: Transparent - Final Hardness 72 Shore A. Working Time: 30 Seconds – Min Setting Time In Mouth: 3 min

Flexitime Bite (Scannable) - Modern Bite Registration

A extra hard, fast setting, scannable bite registration material. It is suited for universal bite registration as well as for powder-free optical recording of antagonists for CAD/ CAM technology, e.g. for manufacturing of all-ceramic restorations. Extremely fast – Working time 30 seconds, Fast Intraoral Setting time 30 seconds. Extra Hard Shore D 40 (Share A > 94)

Code	Description
H-MR2	Kulzer Memoreg 2 , 2 x 50ml (50035517)
H-MS2	Kulzer Memosil 2, 2 x 50ml (50035018)
HF-B	Kulzer Flexitime Bite, Lavender, 2 x 50ml (50066038)

MEMOSIL 2 MEMOSIL 2 MEMOSIL 2 MEMOSIL 2 MEMOSIL 2 MILITARIA MULZER MULZ

Zhermack - Bite Registration Material

Colorbite D - Thermochromic A-Silicone for bite registration (the colour change indicates that setting time is complete). Colour: Green at 23°C / Yellow above 30°C. Bite registrations with all techniques, intermaxillary centric, protrusion or lateral registration keys. **Final Hardness**: 45 Shore D (Approx Shore 95A). - Working time 30 seconds, Setting time 0:60 (min:s).

Laboratory Uses – Insulating / supporting around teeth during processing / injection technique

Code	Description
Z-CD	Zhermack Colorbite D - 2 x 50ml C200750
Z-OFC	Zhermack Occlufast + Color - 2 x 50ml C200781

Zhermack Colorbite D Colorbite

Zhermack – Clear Transparent Matrix Silicone

Zhermack Elite Glass - Medium bodied CLEAR Addition silicone addition silicone specific for the creation of transparent matrices for aesthetic reconstructions in light-curing composite, with direct technique and indirect technique. Its high transparency and correct processing time make it particularly effective for dischromy, diastemia, fractures, rotation, conoids and other types of dental malformations. Used for making a clear matrix, which can be light-cured through when preparing veneers. High final hardness (70 Shore A) - Working time 40 seconds, Fast Setting time 2:10 (min:s).

Code	Description
Z-EG	Zhermack Elite Glass, 2 x 50ml + Tips C401610

IMPRESSION MATERIAL - ACCESSORIES

Cartridge Dispenser Guns

Mixing Ratio 1:1/2:1 is the most common for most products.

Code	Description
IG-S	Economy Impression Cartridge Dispensing Gun, Mixing Ratio 1:1/2:1
DMG	Detax Impression Cartridge Mixing Gun, Ratio 1:1/2:1 (02699)
IG-41	Impression Cartridge Dispensing Gun, Mixing Ratio 4:1/10:1

Mixing Tips and Intraoral Mixing Tips

Code	Description
IM-MT41	4:1 Ratio Mixing Tips, Yellow / Orange Inside, Pack 48
1101-101141	*** Suits Kulzer Xantopren Comfort Material – 4:1 Ratio Mixing Gun
IM-MTY	Yellow Mixing Tips 1:1, 70mm, 50 (Light Body)
IM-MTP	Pink Mixing Tips 1:1, 83mm, 50 (Medium Body)
IM-MTG	Green Mixing Tips 1:1, 88mm, 50 (Medium / Heavy)
IM-MTBT	Blue Mixing Tips 1:1 Tapered Sharp, 64mm, 50
IM-DMY	Dynamix Machine 5:1 Mixing Tips, Yellow – Pack 50 – Suits Kulzer
וועו-טועו ז	Dynamix Cartridges
IM-IT-Y	Intraoral Mixing Tips, Yellow, Pack 50 – For Light Body Materials
IM-IT-W	Intraoral Mixing Tips, White, Pack 50 – For Medium / Heavy Body

Yellow - Suits Light Body material

Green (Aqua) - Suits Medium - Heavy Body materials

Pink – Suits Medium Body / Soft Liner Materials: eg. Mollosil Plus, Hydrorise

Monophase

Blue (Tapered Tip): Suits Gingival mask mateial eg. Gingifast CAD

Impression Tray Adhesives – Paint On & Spray

Ensures adhesion between the impression materials and impression tray.

Alginate Adhesive

Cavex – For alginate impression material. Inbuilt applicator brush. Miratray Spray – Suitable for alginate impression material.

Co	ode	Description
C-	-TA	Cavex Alginate Adhesive Paint On, 1 x 14ml
IN	M-MS	Hager Werken Miratray Spray Alginate Adhesive, 200ml (554210)

A & C Silicone Adhesive

Kulzer Universal Adhesive – For all A and C silicone impression materials.

Code	Description
H-UA	Kulzer Universal Silicone Adhesive, 10ml (65607758)

IMPRESSION MATERIAL - ACCESSORIES

Mixing Pads For Polysiloxane - C Silicone

Code	Description
H-IMP	Kulzer Impression Material Mixing Pad, 1
Z-IMP	Zhermack Impression Material Mixing Pad - C Silicones - C207201 – 1pc

Impression Material Disinfectant – Refer to page 156

Impression Tray Cleaners

Cavex Green Clean - for removing alginate and gypsum residues from impression trays, spatulas and other instruments. Green powder, pH-neutral, kind to the skin, biodegradable, 1 kg > 500 clean trays, fresh aroma. Makes 10 litres of solution.

Orange Solvent Spray - Cleansing solution on the basis of natural orange oils, for the removal of impression pastes, zinc oxide cements, dispersion adhesive (stickers, labels) from instruments, ideal for the cleaning of stainless steel, surfaces become shiny and are protected, fresh orange flavour.

Code	Description
C-GC	Cavex Green Clean Powder, 1kg
HW-OS	Orange Solvent Spray, 200ml

Alginate Storage Containers

Code	Description
C-AC	Cavex Alginate Airtight Container, 15x15x18cm, Blue/White

Alginate Measure Scoops

Code	Description
AA-HS	Kulzer Alginate Scoop and Water Measure, 1
AA-ZSO	Zhermack Alginate Scoop and Measure for Orthoprint / Tropicalgin / Neocolloid (2 Scoop Ratio: 18g/36ml), 1pc
AA-ZSH5	Zhermack Hydrogrum 5 Alginate Scoop and Measure (2 Scoop Ratio: 14g/30ml), 1
AA-CS	Cavex Alginate Scoop and Water Measure, 1

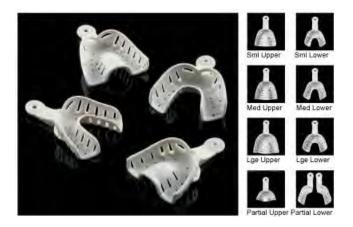

IMPRESSION TRAYS – DENTATE DISPOSABLE

INFECTION CONTROL – IMPRESSION MATERIAL

Impression Material Disinfectant

Cavex Impresafe - Disinfectant for alginate, polyether and silicone impressions. Fast, safe, non-toxic and very effective impression disinfectant.

- 1. 3 Minute soak protocol To kill bacteria, fungi and viruses.
 - a. No negative influence on the impression surface.
- 1 Litre Concentrate = 33 litres ready-to-use disinfectant = 33 weeks disinfected impressions.
- 3. 1 Litre mix can last up to 1 week without changing change earlier as required or when heavily contaminated.

The system includes a disinfection container, one litre of disinfection concentrate, 50 ziplock bags and a digital timer.

Container dimensions: 30.9L x 15.4W x 9.9H cm.

Code	Description
C-IK	Cavex ImpreSafe Starter Kit Includes: 1 x 1 litre Cavex ImpreSafe Disinfection Fluid, 1 x Disinfection Container, 1 x Timer, 50 x Plastic Bags
C-IR	Cavex ImpreSafe Concentrate Refill, 1L
C-IC	Cavex ImpreSafe Disinfection Container
C-IT	Cavex Impresafe Timer
C-IB	Cavex Impresafe ZipLock Plastic Bags, 50

INFECTION CONTROL – SURFACES & INSTRUMENTS

It is important to distinguish between cleaning agents (such as detergents) and disinfectants.

Detergents: Are a cleaning solution. Contain surfactants which aid wetting of surfaces - that is they increase the contact between the water and the surface to be cleaned and the soil adhering to that surface. Surfactants also help to hold the soils in solution, preventing redeposition. Detergents also contain other components to aid the cleaning process such as water softeners and corrosion inhibitors.

Disinfectants: Agents used to inactivate micro-organisms (non-sporing). Disinfectants should never be used as cleaning agents unless specifically formulated for that purpose.

Therapeutic instruments **must be sterilised in a sterilisation machine** following proper industry guidelines. Therapeutic instruments can be precleaned using Clinidet and or ultrasonic cleaner before sterilisation process.

Surface & Instrument Disinfectants

Disinfectant Liquid

Code	Description
VD-5	Viraclean Disinfectant, Pink, 5L
ID5-C	PDS Isopol Disinfectant, Clear, 5L

Whiteley Viraclean – Viraclean is formulated to replace most cleaning products and hospital grade disinfectants. Viraclean can be used for cleaning and disinfecting. Viraclean passes TGA Option B and kills a broad range of other bacteria.

TO CLEAN AND DISINFECT SURFACES: Use undiluted for disinfection. Remove organic soiling (blood, sweat, sputum etc) from surface. Once clean, to disinfect the surface, apply undiluted and **leave to dry for 10 minutes** at room temperature. If required, soak up using fresh, disposable towelling. Used towelling should then be disposed to a suitable receptacle. Not intended for use on therapeutic instruments.

 $VIRACLEAN^{\circ}$ is the only solution that can be used for routine cleaning and can also be used for disinfecting where necessary. This makes for simplification of cleaning and disinfecting procedures.

PDS Isopol (Clear) – Hospital grade disinfectant containing Isopropyl Alcohol 70% for broad spectrum use in surgeries. Surface should be cleaned prior to applying ISOPOL with a suitable detergent like ProDet / Clinidet. NOT TO BE USED on plastics or porous surfaces. May dry out plastics.

Disinfectant Towlette Wipes

Everyday Essentials Hospital Grade Disinfectant Towelettes - Used for rapid disinfection and decontamination of hard, non-porous surfaces.

Broad spectrum, multi-purpose disinfectant cleaner for use on plastics, stainless steel, non-porous vinyl and upholstery, painted surfaces, glass, etc. Supports infection control procedures in hospitals, surgeries, clinics and other active environments. Not intended for use on therapeutic instruments.

- Hospital Grade Disinfectant tested against TGO54 Option B "dirty" conditions
- 10 second kill time for Gram +ve & Gram -ve organisms (BS EN 1276)
- Contains food grade plasticiser to maintain plastic, vinyl and upholstery surfaces
- Formulated and tested in Australia
- 0.28% Benzethonium Chloride, 18% Isopropyl Alcohol

Code	Description
MWD	Everyday Essentials Hospital Grade Disinfectant HGD Towelettes,
IVIVVD	Cannister (990394), 220 Towels

INFECTION CONTROL - DETERGENTS

It is important to distinguish between cleaning agents (such as detergents) and disinfectants.

Detergents: Are a cleaning solution. Contain surfactants which aid wetting of surfaces - that is they increase the contact between the water and the surface to be cleaned and the soil adhering to that surface. Surfactants also help to hold the soils in solution, preventing redeposition. Detergents also contain other components to aid the cleaning process such as water softeners and corrosion inhibitors.

Disinfectants: Agents used to inactivate micro-organisms (non-sporing). *Disinfectants should never be used as cleaning agents* unless specifically formulated for that purpose. Therapeutic instruments must be sterilised in a sterilisation machine following proper industry guidelines. Therapeutic instruments can be precleaned using ProDet and or ultrasonic cleaner before sterilisation process.

Surface and Instrument Detergents

ProDet (Previously "Clinidet") Clinical Detergent

Code	Description
CD-5	ProDet Clinical Detergent (<i>Previously known as Clinidet Detergent</i>) - 5L (PD5)
CD-15	ProDet Clinical Detergent (<i>Previously known as Clinidet Detergent</i>) - 15L (3 x 5L) - Multibuy Price
	ProDet Accessories
CD-P	ProDet 8ml Pump To Fit 5L Bottle - 1 (CLP)
CD-SB	ProDet 500ml Spray Bottle Only (Empty) (CLDS)

ProDet - Medical and Dental Instrument & Equipment Detergent. For manual or ultrasonic cleaning. ProDet used at the **recommended dilution**, is a suitable detergent for cleaning instruments, surgical tables, equipment, floors, bowls, glassware and aspirating or suction tubes. ProDet may be applied from a dispenser. ProDet has a corrosion inhibitor incorporated into the formulation. It is powerful as a cleaner yet gentle to high quality instruments or equipment. ProDet is an advanced formula, safe for humans and the environment, and includes special features such as corrosion inhibitors and buffers.

- Highly economical only 4ml of ProDet mixed with tap water makes 1L of Cleaning Solution. (Can last up to 1 week in mixed spray bottle)
- Excellent wetting (detergency) across a broad temperature range
- Very low foaming under dynamic conditions even at ambient temperature
- Corrosion inhibitor incorporated into the formulation
- Mild alkaline formulation
- Improved performance in hard water
- No irritating or hazardous ingredients

Surface and Instrument Detergents - Ultrasonic

Code	Description
H-VK	Kulzer VibraKleen E2, 80 Tablet Pack

VibraKleen E2 is an enzymatic ultrasonic cleaning solution in an easy-to-use tablet form. Effervescent and enzymatic, Vibrakleen E2 tablets save valuable storage space and break down hard-to-clean deposits in ultrasonic and evacuation systems. Makes approximately 150 litres. Convenient and effective for:

- General purpose ultrasonic cleaning
- Pre-soak for instruments
- Evacuation system cleaner
- Break down and remove blood, food particles, compounds, and other soils.
- Can be used safely on acrylics and high-quality metals.

INFECTION CONTROL – HAND HYGIENE

Hand Wash (Soaps) - Skin Cleaner

Best suited for routine handwash where soap and water are used in conjunction with mechanical friction to remove soil and potential cross-contaminants acquired throughout the course of everyday consulting & procedural non invasive. Best used: Before and after routine patient contact and personal hygiene.

GOJO Hand Wash - General

Provides rich, thick lather for a luxurious handwashing experience. Gentle on skin. Pleasant cranberry fragrance. Translucent purple colour.

Code	Description
